Baylor has strengthened its recruiting efforts substantially in recent years. The initiative shows in the University’s enrollment figures, which have set records since fall 1998. And now that record numbers of students are attending Baylor, the administration has made it a priority to find better ways of keeping them here after their first year.

While Baylor’s retention rate compares favorably to other Big XII schools (see sidebar on page 3), the administration wants to improve it. This academic year, 17 of 100 students who enrolled at Baylor as freshmen didn’t return as sophomores. They either transferred to other schools, became academically ineligible or dropped out.

Each of those non-returning students represents a major loss — not only in human potential, but also in thousands of dollars for Baylor. That’s why the University administration recently created a Baylor Success Center to keep more students enrolled in and graduating from Baylor.

The initiative began last year when President Robert B. Sloan Jr. asked Dr. Charles S. Madden, vice president for University relations, to work with the Office of Institutional
Robinson to Speak at Honors Week

The University will salute the academic accomplishments of some of the brightest students in the College of Arts and Sciences and the faculty who serve as their mentors during the ninth annual Harry and Anna Jeanes Honors Week, April 17-20.

Activities planned include students’ presentations of their Honors theses, the Honors Week Convocation, a banquet for senior honors students and their mentors and a dessert party for all Baylor faculty and honors students.

“When we began planning this week nine years ago, we thought it was fitting to set aside a time for focus on the academic mission of the University,” said Dr. Wallace Daniel, dean of the College of Arts and Sciences. “We felt it was a time to provide connections.”

“T. St. El., in commenting on Dante’s Inferno, describes hell as someplace ‘where nothing connects with nothing.’ The University has to provide those connections. It has to work to re-create the totality of knowledge, to go beyond the expected. Honors Week reminds us of the accomplishments of scholars on campus and challenges each of us — students, professor, administrator and Regents — to continue in and support the life of the academy.”

Convocation address

At 2 p.m. April 18 in Armstrong Browning Library, Dr. Olin Robison, president and chief executive officer of the Salzburg Seminar, will deliver the convocation address, which will reflect on his years as an undergraduate at Baylor and a graduate student at Oxford University as they relate to his years of work in government and higher education.

“I am a committed internationalist,” Dr. Robison said. “I am especially interested in the phenomenon of globalization and how that may affect the world of higher education, including fine places like Baylor and Middlebury.”

Robison is a visionary and a national leader in the field of international studies and education and is strongly committed to seeking connections to other institutions by such publications as the College of Arts and Sciences.

Robison is the former director of the Salzburg Seminar, a leading forum for promoting global dialogue on issues of pressing international concern.

As an acknowledged expert on U.S.-Soviet relations, Dr. Robison also serves at the State Department as special assistant to deputy undersecretary XI Alex Johnson, Foy D. Koller and Charles Bolden. He has also served on or chaired numerous commissions and task forces, including the U.S. Advisory Commission on Public Diplomacy.

At Olin Robison is president emeritus of Middlebury College and during his presidency the international programs of the college reached a new level of excellence,” Dr. Daniel said. “Dr. Robison is a visionary and a national leader in the field of international studies and education and is committed internationally.”

Baylor alumnus, Olin Robison says his time at Baylor and his Administration has been a life time of learning and making connections to Baylor alumni. He has also been an active member of the Baylor Alumni Association, which includes the Alumni Board of Directors, the Alumni Executive Committee, and the Alumni Association Board of Directors.

When asked what he enjoyed most about his time at Baylor, Olin Robison said that his time was a time of learning and making connections to Baylor alumni. He has also been an active member of the Baylor Alumni Association, which includes the Alumni Board of Directors, the Alumni Executive Committee, and the Alumni Association Board of Directors.

Proactive Measures will Aid Academic Success

Mandatory testing of incoming freshmen, continuously updated database and other measures being put into place

continued from page 1

Enrollment testing to build a model that could evaluate factors most likely to cause a student to leave Baylor. As work on the model progressed, Dr. Sloan said, “he became interested in the project’s focus.

“The course of our discussions, the president decided that a retention effort was the natural outgrowth of our recruiting effort,” he said.

Because of that, he knew what to do in order to achieve academic success. He knew that early intervention has the potential to forestall a number of problems. He knew that early intervention can help students who wouldn’t find advice until much later, but he will identify early on and make the student aware of it.’’

Admission

Each freshman will be assigned an advisor who will discuss academic goals and other opportunities. This approach seeks to advise students in a consistent manner.

‘‘Right now, every college and school at Baylor has a slightly different set of requirements — students in terms of advisors,” Dr. Madden said.

Some require an advisor sign off each semester on everything a student takes. In the case of another school, as long as a student is registered they’re fine. We need to strike a balance and provide uniformity to make sure students are supported equally everywhere.’’

Tracking student progress

A critical component of the Center will be an in-student tracking system, designed to continuously assess students’ progress. Information on each incoming student will be updated weekly in a web-based database. The security- protected information will be available to counselors, advisors, academic officials, professors, coaches and others who have a significant role in that student’s success. The database will contain standard information such as grades and class attendance, and also report on that student’s involvement in tutoring, a service project, athletic training or a change in major. It will also record illness or a family crisis.

Keeping this comprehensive data base updated in a timely way will require an increased reporting commitment.

’’Using the tracking system will involve building an agreement with faculty to tell us what’s going on,’’ Dr. Madden said. ’’That’s been sort of sporadic across the University — we have yet to get full defection reports in. But by submitting deficiency reports under the new system, every red flag in the world will go up, and we’ll have a chance at that point, in the middle of the semester, of really helping someone make it through. But we’re going to have to get a fairly stringent commitment back from faculty that they will do all that.’’

Low said, ’’another advantage of the tracking system will be increased communication between Baylor offices. Everyone will have a more accurate idea of how extensively campus resources are being used.’’

Crisis intervention

The plan calls for an immediate reaction by Baylor officials when it’s determined that a student is in serious trouble.

’’The Success Center will have a group we’re calling for present purposes the fire department,’’ Dr. Madden said. ’’When a student is in some kind of crisis — a death in the family, a serious illness, financial problems, all kinds of things — we’re able to put together a cruise group to help the student, using resources we already have.’’

Life planning

In this new intermx, Baylor’s Career Center Services will do more than match graduating seniors with prospective employers.

’’We’re going to meet the Career Center Services from not only helping students find jobs, but to helping them discover what kind of job they ought to be doing,’’ Dr. Madden said. ’’We’ll also help students over time build networks and connections that will lead them into the career they want to do.’’

’’The big thing about this is that philosophically we’re going to move to a life career with students. By getting involved with students through the Success Center, we hope to make a foundation for interacting with them long after they leave here — the idea of ’’once a Bear, always a Bear’’.’’

Dr. Caleb Olidopo takes an opportunity to interact personally with a student.

The institutional benefits of this change are only part of the overall Baylor message.

Our mission is to help students succeed. Wherever possible and affordable, we hope that Baylor will help support students to succeed in their future endeavors.

President’s Concert in Memory of Sternberg

The 17th annual President’s Concert will be at 8 p.m. April 21 in Jones Concert Hall and is free to the public.

Dr. Robert B. Sloan Jr. and in memory of former Music School Dean Daniel Sternberg will perform last August.

’’Dr. Sternberg is revered in Baylor history as the man who perhaps more than anyone else, made the School of Music what it is today,’’ Dr. Sloan said.

Kraft said the project will be a wonderful event for Wolfgang Amadeus Mozart, his “Requiem” and “Ave Verum Corpus.”

Professor of conducting, director of vocal studies, director of choral activities and Ph.D. Mary Gibbs JonesProfessor of Music, will conduct the Baylor Symphony Orchestra, the A Capella Choir and the Concert Choir in all, more than 200 students will be involved in the performance.

’’This is a grand final concerto, and serves as a musical showcase for the remarkable talent of Baylor music students,” Kraft said.

The “Requiem” was commissioned by Count Waldegg in memory of his wife and was to be played annually on the anniversary of her death.

Mozart died before finishing the work, so his pupil, Franz Xaver Süssmayr, completed it in Mozart’s style. It remains one of the towering masterpieces of choral literature.

Three months before his death, Mozart composed “Ave Verum Corpus” for his friend, Anton Strobl, who served as school and church choir director in the small town of Baden near Vienna.

General admission tickets are $5. For more information, call Veit at ext. 3991. — Ashley Wright

Making social connections is an important component of retention.

Dr. Caleb Olidopo takes an opportunity to interact personally with a student.

April 2001
AirBear On Campus

Faculty, staff and students now can connect their laptop computers to the Internet without being stuck to an office, lab or a room in a residence hall through Baylor’s new wireless data network, AirBear.

“This is another way that information technology can be employed as a tool to help faculty, staff and students do their work in an academic setting,” said Carl Flynn, assistant ResNet support coordinator in Baylor’s Information Technology Center (ITC). “The wireless network will always be available, but AirBear gives everyone more freedom and convenience to work and move around campus.”

An extension of the main campus network, AirBear is free to anyone with a valid Bear ID and password. However, users first must purchase a wireless ethernet card, which is available at Baylor’s campus-computer store, and download the free network authentication (NetAuth) software from the AirBear web site.

“Once a laptop is properly configured, students, faculty and staff can sit in any coverage area, such as right outside the coffee shop in the student center, and connect to the network,” Flynn said. “They can work on a project, do research, download homework and check e-mail whenever they’re near any access point. It might not be as fast as a connection as a hard-wired network, but it is faster than a 56k modem.”

Coverage areas include the garden level and first, second and third floors of Moody Library; the first and second floors of Jones Library; the second floor of Paige Library; the first, second and third floors of the Bill Daniel Student Center; the Hankamer and Cashiers buildings, and at the marina. Future expansions are planned.

For more information on AirBear, including campus coverage maps and set-up procedures, log on to www.baylor.edu/airbear or contact Chris Flynn at 254-318-6900 or ResNet_Comments@baylor.edu.

— Lori Scott Fogleman

Hook Appointed to New Position

Jonathan D. Hook joined the administrative staff Feb. 5 in the newly created position of associate vice president and chief investment officer for the University. David Brooks, vice president for finance and administration, announced the appointment.

Hook will be responsible for managing the operations and staff of the Office of Investments, as well as recommending investment strategies and investment managers for the University’s endowment and other cash/near-cash assets, recommending investment policies to appropriate administrators and ensuring accountability of the investment managers for meeting Baylor’s expected financial returns.

Dr. Robert B. Sloan Jr. welcomes Stacy Riddle during groundbreaking ceremonies Feb. 23 on the $5.5 million Panhellenic building project, the Stacy Riddle Forum, which will serve as a common ground for sororities on campus. A 1989 Baylor graduate, Riddle and her family — through the Houston-based Riddle Foundation — have given several million dollars to various construction efforts at Baylor, the largest recipient of foundation contributions.

Davis Honored with Endowed Scholarship

Baylor Regents and Austin attorney Will D. Davis was honored for more than three decades of service and leadership to Texas public schools when friends, fellow Regents and state and education leaders gave more than $15,000 to establish the Will D. Davis Endowed Scholarship in the Baylor School of Education.

The scholarship was announced Jan. 30 at a dinner in Austin. Among those attending were Texas Speaker of the House Pete Laney, Texas Railroad Commissioner Carole Keeton Rylander, Sen. Rodney Ellis, Sen. Teel Bivins, former Higher Education Committee Chair Wilhelmmina Delco, former chair of the State Board of Education Jack Christie and Carolyn Crawford, Baylor Regents Chair John G. Wilkinson, Baylor Regents Rerald Ferguson, Will D. Davis Elementary School Teacher Emma W. Norton and fellow Baylor graduate and friend Ebbie Grinstead.

The scholarship will be used to recruit highly committed and academically talented students into teaching, said Dr. Robert J. Yinger, dean of the School of Education.

“We are excited and honored by the establishment of this endowment that honors the lifelong work of such an esteemed Texas educator,” Dr. Yinger said.

A Baylor Trustee from 1972-1982 and a Baylor Regents since 1986, Davis has served the Texas public school system and Texas higher education in several capacities. He is a long-time member and former vice chair of the State Board of Education, former member of the Coordinating Board for the Texas College and University System, former president of the boards of trustees of Austin ISD and Austin Community College and a member of the board of trustees of St. Edward’s University in Austin. He also is a past president of the Texas Association of School Boards and the National School Boards Association.

Additionally, Davis served as a member of the 1981-84 Governor’s Select Committee on Public Education, which produced numerous education reforms passed by the Texas Legislature in 1984, and was called again to serve on the 1988 committee, which studied the school finance issue.

A former Baylor student body president and football player, Davis graduated from Sam Houston State University in 1954 with a bachelor of business administration degree and an LL.B. (now juris doctor) degree. While attending Baylor Law School, he was editor of the Baylor Law Forum. Davis also is a former president of the Baylor Alumni Association and was honored with the Baylor Distinguished Alumni Award in 1985, the Price Daniel Distinguished Public Service Award in 1992 and the W.R. White Meritorious Service Award in 1982.

Davis is a partner with the Austin law firm of Heald, Davis & Vickers. He is a former Texas assistant attorney general and a former general counsel for the State Board of Insurance. — BN

Upcoming Spring Programs

April 3 “Reflections on Axel Munthe” Speaker: Karinna Munthe-Ludvigsen, Munthe Family Foundation Contact Dr. Alden Smith, ext. 1399

“Music at Baylor” debuts on KWBU-FM public radio

If you missed one of the School of Music’s live performances, you may have a chance to catch it on public radio station KWBU-FM (107.1 MHz).

“Music at Baylor,” which debuted in March, is a 60-minute program that features some of Baylor’s most memorable musical performances, as well as behind-the-scenes visits with guest artists, faculty and students at the School of Music.

Dick Velt, Baylor’s concert and promotions manager, hosts and produces the weekly show, which airs at 7 p.m. Mondays and again at 7 p.m. Saturdays. — BN
As pros and cons of ubiquitous campus computing are explored, study group initiates pilot project to gather data

Teaching and Learning with Technology: eBIC

As to the second part of the recommendation, with student ownership of computers currently approaching or exceeding 90 percent of incoming freshmen, the study group decided to recommend, rather than require, ownership of suitable computers by students. As part of the eBIC project, students will be "strongly encouraged" to own a suitable computer, with the specific configuration following the published best-practice guidelines.

**New technologies**

New technologies are powerful, but power can be used wisely or unwisely. As a university committed to integrating thought and the Christian tradition, Baylor seeks to be at the cutting edge not only in terms of "how to" but also of "what for." We will seek to incorporate digital technology and web resources into the curriculum as appropriate. We also will seek to help students develop a more critical understanding of the nature and value of the resources available on the Internet, learning with them how to evaluate rather than merely accept what is new and inherently interesting. We will seek to bridge the gap between inherited wisdom and learning, and the best of what the new technologies can offer.
With sympathy to:
Dr. William H. Bellinger Jr., professor of religion, on the death of his father, Dr. William H. Bellinger.

Hosanna in the Highest

Recognition Service Set

Service of Remembrance for victims of the Holocaust and a presentation by Dr. Deborah Lipstadt will be held at Baylor at 1:15 p.m. April 22 on the fifth floor of the Classroom Academic Center.

The Service of Remembrance, sponsored by the Waco Conference of Christians and Jews, Congregation Agudath Jacob and Temple Rodef Sholom, will honor victims of the Holocaust through prayer, readings and song. The Conference of Christians and Jews is an interfaith dialogue group that sponsors social action outreach projects.

Immediately after the service, the Rapport Committee of Temple Rodef Sholom and Baylor University will co-sponsor a presentation by Dr. Deborah Lipshtad, the Robert Professor of Modern Jewish and Holocaust Studies at Emory University in Atlanta and author of Denying the Holocaust: The Growing Assault on Truth and Memory. The book is the first full-length study on this topic and has been published in Germany, Switzerland, Japan, Australia and New Zealand.

Dr. Lipstadt recently received a favorable verdict in a libel trial. She is writing a book recounting the five-year ordeal and her experience as a defendant.

Dr. Lipstadt is an historical consultant for the U.S. Holocaust Memorial Museum. She helped design the section of the museum dedicated to the American response to the Holocaust. She was appointed to serve on the U.S. Holocaust Memorial Council, a member of the Executive Committee of the Council and chair of the Museum’s Academic Committee, which oversees the Center for Advanced Holocaust Studies.

Dr. Lipstadt frequently is asked to comment on Jewish issues by national and international media.

“The Service of Remembrance and Dr. Lipstadt’s talk are powerful opportunities for us to remain vigilant in the wake of intolerance and hatred that permeate elements of our society,” said Rabbi Seth Stander of Temple Rodef Sholom.

“We hope the presence of numerous participants will show our community how important meaningful dialogue can be in creating safe, harmonious relationships for all,” said Rabbi Stander.

Outstanding Staff

For the first time, 26 part-time staff members were honored for their service to the University, including a professorship award for Lou Bernet, a greeter for more than two decades at Moody Library. Also honored for 20 years of part-time service was Martha A. Finn, a host/ess checker in Armstrong Dining Room. This year’s ceremony, continuing a tradition begun in 1947, was coordinated by the Compensation and Benefits Office, including assistance from personnel services, payroll, public relations, University host, Bill Daniel Student Center, the Division of Human Resources and organizational development — Lori Scott Fogleman

Eight Baylor staff members were named Outstanding Staff at the annual Service Awards Ceremony Feb. 28 in the Bardfield Drawing Rooms of the Bill Daniel Student Center. Honorees were selected by a committee of University staff following nominations from Baylor faculty and staff. Those selected received a certificate signed by Baylor President Robert B. Schouman, and an award of $1,500. This fall, they will receive recognition in the Baylor Homecoming parade.

In addition to the eight staff members pictured above, Kent Ellis, University host/convention services, was present with the BALLOONISTA Award: The Salute of the Year in recognition of his exemplary service.

Also recognized for their service to Baylor were more than 220 University faculty and staff who received service pins ranging from 5 years to 35 years. Seven faculty and staff members received recognition for 30 years of service. Receiving pins for 55 years of service were Dr. William R. Cooper, professor of philosophy, and Dr. Gary K. Hull, associate professor of history.

Terry M. Roller, professor of art, received a Silver Award, two Bronze Awards and a shared Gold Award in the combined Advertising Club of Waco/Granada Texan Ad Club League (Tiple/Killer/Consumer Group) annual American Advertising Awards competition Feb. 10. One Bronze Award was for a poster promoting the visit of Rosamund Renier to Baylor, sponsored by the Adoration Art Institute. Eleven Baylor graphic design and photography students won five Gold Awards, eight Silver Awards and five Bronze Awards.

Heather Johns took first prize of Student Show.

The Office of Public Relations won two Gold, five Silver and two Bronze awards at the advertising Club of Waco/Granada Texan Ad Club League annual American Advertising Awards competition. The Golds were for the 1999-2000 Annual Report and the Wurster Veterans Center Poster Design. The Silvers were for the Radio Poetry Festival T-shirt, Collegeville magazine and Art & Soul promotional materials. The Bronzes were for the Collegeville newspaper and The Tradition poster.

Eric Yarbrough, art director, designed all the pieces except Collegeville, designed by Randy Morrison, associate art director.
Sign Up Now for Susan G. Komen Race

Facility staff and students can use the form below or one on the web to sign up for the Susan G. Komen Breast Cancer Foundation Central Texas Race for the Cure®. Registration forms can be downloaded from www.centraltexasraceforthecure.org. Forms also are available at Richland, Temple and Killeen malls or any local sponsor. Baylor is a host sponsor for this year’s race.

The pre-registration fee for the 5K race and a one-mile “Fun Walk/Run” for people of all ages and athletic abilities is $10 before April 20, $15 from April 21-27 and $25 on race day. Runners can have their race timed for an additional $2. T-shirts for supporters are $16.

The one-mile walk/run begins at 8:15 a.m. April 28, with the 5K beginning at 9:30 a.m. Race day events include a Kiwanis pancake breakfast, a visit from popular book and television show character Arthur, a live performance from singer/songwriter Angie Pack who will preview her newest release “I Want to Live,” a survivors’ ceremony, an awards presentation and drawings for door prizes. For more information, call the race hotline at (254) 776-1204 or visit the web site cited — www.centraltexasraceforthecure.org.
