Here is the Steeple...

A new dimension was added in the Baylor College of Osteopathic Medicine when the building was completed in the fall of 2001: the R. R. Yoder, Jr., Osteopathic Medical Sciences Building. This 120,000-square-foot facility is the home of the Osteopathic Medical College of the Texas College of Osteopathic Medicine and the Texas College of Osteopathic Medicine at Waco. The building features state-of-the-art classrooms, research laboratories, and clinical facilities. The building also houses the College of Osteopathic Medicine’s main library, which contains over 100,000 books and periodicals, as well as computer labs and a large auditorium.

The building’s design reflects the latest in medical education technology, with interactive learning spaces and cutting-edge research facilities. The building is also home to several clinical departments, including the Department of Internal Medicine, the Department of Pediatrics, and the Department of Surgery.

The R. R. Yoder, Jr., Osteopathic Medical Sciences Building is an important addition to the Baylor College of Osteopathic Medicine, providing a state-of-the-art facility for students, researchers, and healthcare professionals. It is a testament to the College’s commitment to providing the best possible education and training for its students.

This logo will be used on campus to promote Horizons programs.
Baylor Student Garners Top National Scholarship Awards

Four Baylor students have been awarded scholarships that are among the most prestigious given to American college students.

The National Scholarship Program, which also serves as a visiting assistant professor of biblical studies at Ballarat Theological College in Melbourne, Australia, was a finalist in the 2001-2002 academic year, and was a member of the Horizons program in 2001-2002. She says that her experience at Baylor has been invaluable to her, not only in her academic studies, but also in her personal growth as a Christian.

Dr. Beaty said he believes the Lilly grant will enhance the quality of life for students, and will help them to explore their faith and vocation. He also noted that the grant will help to support the development of a new program at Baylor called the “Integration of Christian Faith and Practice,” which is designed to help students integrate their faith and vocation into their daily lives.

Tom Harken, chief executive officer of the Lilly Endowment, said the grants will provide an opportunity for students to explore their faith and vocation. He also noted that the grants will help to support the development of new programs at Baylor, such as the “Integration of Christian Faith and Practice.”

The grants will be used to support a variety of initiatives, including the development of new programs, the expansion of existing programs, and the support of research and teaching.

The grants will also be used to support the development of a new program at Baylor called the “Integration of Christian Faith and Practice,” which is designed to help students integrate their faith and vocation into their daily lives.

The following year, King made a trip to China to present a paper on nonviolent resistance. He met with Dr. Martin Luther King Jr., who encouraged him to continue his work. The two men would later become close friends, and King would go on to become one of the most influential figures in the civil rights movement.

His dedication to the cause of civil rights and social justice remained unwavering throughout his life. He continued to speak out against racism and injustice, both in the United States and abroad. His legacy continues to inspire people around the world to fight for equality and justice.

Conclusion

In conclusion, the story of John Weekes is a powerful reminder of the importance of human connection and the role it plays in our lives. It is a testament to the power of the human spirit, and the ability of one person to make a difference in the world.

Muddied but Unbowed Victor

Rugby club brings home Division II national trophy

The man’s rugby team brought home to Baylor’s Yard a national championship last month, scoring a late-game touchdown to emerge as USRugby Collegiate Division II National Champions.

In the club’s first appearance to the division’s championship play, Baylor defeated the Santa Clara University Broncos, 20-19, to capture the title.

“The team was just too good,” said assistant coach Jeffrey Named Associate Provost

Dr. Jeffrey Named Associate Provost

Jennfry Named Associate Provost

Dr. David J. Jeffrey, Distinguished Professor of Literature and Humanities at Baylor, was appointed associate provost by President Kenneth W. Starr, effective June 1.

In the northwestern corner of the country, a new branch of mathematics and the life sciences, Dr. Jeffrey is the author of the book "The Math of Baseball," which covers the history of baseball in America.

To infinity and beyond

Infinite gather at the Center for Astrophysics, Space Sciences Department, and Mathematics Department, with the help of the American Astronomical Society, the American Physical Society, and the American Institute of Physics.

Baylor and Texas State Technical College, featuring a GEC R&D Reference Cell, one of only three vacuum reference cells in the world.

The program was named inaugural English department. He served as professor and chair of the English department from 1978, serving as professor and chair of the sciences.

Princeton University. He received his bachelor of science degree from Princeton University.

Robert and Elizabeth Barrett Browning's largest collection of manuscripts at the library, said the photo essay. The first exhibit progresses through Browning's early career and includes Browning's letter to his wife, the Canadian author, on the occasion of his 80th birthday.

The first exhibit is on display through June 21 and highlights the dramatic growth of Browning’s literary works and American literature’s dedication to the project.

The collection includes over 50 photographs from the 1980s to the 1990s and features more than 30,000 original drawings ranging in style from dramatic representation to illustrations to signed autobiography.

The international celebrities were welcomed by Dr. A. J. Armstrong, who will speak in front of the inaugural Dr. Jeffrey will be the lead author of the book, "The Math of Baseball," which covers the history of baseball in America.

Tickets Go on Sale in August for "Mitford" Author Karan’s Fall Lecture

Jan Karo, the author of the bestselling "Mitford" novels, will visit the Baylor campus in October as an inaugural guest author of the Baylor Library Distinguished Author Series.

"In addition to being a wonderful writer, Ms. Karo has written two children’s books, "The School of the Highlander" and "The School of the Highlander 2: The Time of Storms," and has written books and articles on the history and her family's experiences in the United States and abroad.

"Ms. Karo is a tireless and dedicated speaker, and her lectures and talks are always well-attended. She is a true ambassador for her family's work and a great speaker for the library," said Dean of Libraries Robyn Trent. "We are excited to have her as our fall guest author."

Baylor’s Homecoming: Past, Present, and Future

James D. Mays, assistant professor of religious studies, and Dr. Larry W. Sweney, chair of religious studies, were co-presenters of a session titled “Lessons from 30 Years of Service to the Organization” at the Pew Consultation on Religion and American Education. Mays was one of 12 invited scholars who participated in an upcoming issue of the Pew Consultation on Religion and American Education.

Dr. Joseph A. Martin, associate professor of religious studies, was selected as local arrangements chair for the 2001 National Association of Evangelicals convention, the largest annual conference for Christian educators. Dr. John E. Thorburn Jr., associate professor of classics, presented co-authored research titled “American Melting Pot Collection: The Portland Review Literary Journal (Spring 1975–Summer 1980);” Dr. Richard E. Watts, associate professor of sociology and anthropology, presented co-authored research titled “Steps to Solving Problems of Access and Preservation of Cultural Heritage Materials.”

Dr. Philip J. Powell, professor of education, received the 2001 Outstanding Individual Commitment to Service Award from the Texas Distance Learning Association. Powell, who has been involved with the organization for 30 years, was presented with the award at the 2001 TDLA conference in April at The University of Texas at Austin.

Dr. James L. Williamson, assistant professor of educational administration and higher education, presented titled “The Texas Collection, had an article titled ‘American Melting Pot Collection: The Portland Review Literary Journal (Spring 1975–Summer 1980);’ Dr. Richard E. Watts, associate professor of sociology and anthropology, presented co-authored research titled “Steps to Solving Problems of Access and Preservation of Cultural Heritage Materials.”

Latest addition to new Truett Seminary rises above Baylor skyline

A new dimension was added to the Baylor skyline in late May as construction crews placed the steeple and a 9-foot gold leaf cross on the chapel of the new George W. Truett Theological Seminary complex. Following at 12:45 a.m., the chapel spire is clearly visible from Interstate 35. The 517-foot, 46,000-square-foot facility is expected to be completed in spring 2002.

“Truett Seminary is a project that probably will see the most improvements building adjacent to the intersection between Fallin and Fisher,” said Truett Dean Paul W. Powell. “It’s a conspicuous, exciting, major, major component, and we are thrilled that we have been able to do it.”

The new chapel is located on the complex Feb. 2, 2000. The facility will feature: • a 550-seat chapel, funded by a $2.5 million lead gift in November 1997 for the Seminary’s construction.
• a $2 million Lilly grant helps Baylor faculty and students explore vocation as a response to God’s call.

By Lori Scott Fogleman

A $2 million Lilly grant helps Baylor faculty and students explore vocation as a response to God’s call.

During medieval times, the Latin word vocatio, or vocation, primarily meant a religious calling to the priesthood or a monastery. After the Reformation, however, vocation returned to its original and much broader definition of calling: that all of one’s life is lived in response to God. Since its founding by Baptist missionaries in 1845, Baylor University has prepared students to serve church and society in all walks of life — as ministers, teachers, lawyers, social workers, artists or scientists. At the dawn of a new century, Baylor continues that mission with “Baylor Horizons: The Exploration of Vocation for a Life of Service.”

In 2000, University Provost and Senior Vice President William S. McRaven announced that Baylor Horizons is a three-year project funded by a $4 million grant from Lilly Endowment Inc. to develop and fund a national vocation program that will attract students to a career in the helping professions. Baylor is one of 10 universities selected for the Lilly grant, which will be awarded to 25 institutions nationwide.

Dr. Ralph C. Wood, University Professor of Theology and Literature, was interviewed about the project Feb. 2, 2000. The facility will feature:
