Multimedia Device Requirements

Microphone

All microphones work well with Cisco JabberVideo. Note that some cameras have built-in microphones. We recommend a headset with microphone for best control of background noise.

Camera

A large number of cameras have been tested with several versions of Cisco JabberVideo. While Jabber should work with every camera, the cameras that the Cisco team are using on a regular basis and are guaranteed to perform well are, as of Jabber version 4.3:

- Cisco TelePresence PrecisionHD USB Camera (recommended for business-quality HD video)
- Apple iSight cameras
- Cisco VT Camera III
- Creative Live! Cam Socialize HD 1080
- Lenovo Thinkpad cameras
- Logitech HD Pro Webcam C910
- Logitech HD Webcam C310
- Logitech QuickCam Pro
- Logitech QuickCam Pro 9000
- Microsoft LifeCam Studio
- Microsoft LifeCam HD-6000
