Called
to live,
to lead,
to serve

A \$2 million Lilly grant helps Baylor faculty and students explore vocation as a response to God's call.

By Lori Scott Fogleman

During medieval times, the Latin word *vocatio*, or vocation, primarily meant a religious calling to the priesthood or a monastery. After the Reformation, however, vocation returned to its original and much broader definition of calling: that all of one's life is lived in response to God.

Since its founding by Baptist missionaries in 1845, Baylor University has prepared students to serve church and society in all walks of life — as ministers, teachers, lawyers, social workers, artists or scientists.

At the dawn of a new century, Baylor continues that mission with "Baylor Horizons: The Exploration of Vocation for a Life of Service," a comprehensive three-year project funded by a \$2 million grant from Lilly Endowment Inc. awarded in fall 2000. While the impact of the Horizons program will be far-reaching, a primary objective is to

unite two University divisions — academic affairs and student life — to help Baylor students foster a deeper theological understanding of vocation as God's calling to a life of service.

"Baylor Horizons isn't something new; it's not adding on to Baylor something that has not been a part of its history," said philosophy professor Michael Beaty, Horizons project director and director of Baylor's Institute for Faith and Learning. "Part of what the project aims to do is to recover this older, broader, deeper notion of vocation, of living in response to God's calling, whether that's in the ministry or mission field, in professional careers or as families, spouses, parents and children. The Baylor experience is supposed to help cultivate in all of us these kinds of moments when we're trying to discern what God's will is and if this opportunity fits well within our vocation."

The Baylor Horizons project hopes to accomplish that through initiatives that encourage students to explore vocation as a framework for life, church leadership and professional service. It also provides opportunities

Chartered in 1845 by the Republic of Texas, Baylor University is the state's oldest continually operating institution of higher learning and is the largest Baptist university in the world. With more than 13,700 students and 600 full-time faculty, Baylor offers undergraduate, graduate and professional degrees through the College of Arts and Sciences, the Hankamer School of Business, the School of Education, the School of Music, the Louise Herrington School of Nursing, the School of Engineering and Computer Science, the School of Law, the Graduate School and George W. Truett Theological Seminary. Baylor is consistently ranked among the top college values in the country by such publications as *Fisk Guide to Colleges* and *Princeton Review*.

Administrative Changes Announced

Hulme acting VP for Student Life Division

Baylor President Robert B. Sloan Jr. announced June 8 the resignation of Dr. Steven G.W. Moore as the University's vice president for student life, effective July 31. Dr. Moore, who joined the Baylor administration in fall 1998, has been named senior vice president at Asbury Theological Seminary in Wilmore, Ky. He concurrently will hold a Presidential Fellowship with the Council of Christian Colleges and Universities.

"Dr. Moore has made a tremendous contribution to our student life division through the heart he has for our students," Dr. Sloan said. "Though he will be missed at the University, Dr. Moore has done a good job of preparing new leadership in the student life division that will keep several new initiatives moving forward. We wish Dr. Moore and his family our best as he returns to his alma mater to serve in this important leadership role in Christian higher education."

Before coming to Baylor, Dr. Moore served for nine years as vice president for campus life at Seattle Pacific University. He holds a bachelor's degree from McMurry University, a master of divinity from Asbury Seminary and a doctorate from the University of Michigan.

"It has been a privilege to serve Baylor's remarkable students alongside the outstanding

Dr. Hulme

Sloan's announcement. Dr. Moore will assist her with the transition until the effective date of his resignation.

A 1982 Baylor graduate, Dr. Hulme served as vice president for student life and interim chief information officer at George Fox University in Newberg, Ore., prior to joining the Baylor student life staff in fall 1999. She earned her bachelor's degree in education from Baylor, where she was a member of the women's volleyball team. She earned her master's degree in social science from Azusa Pacific University in Los Angeles, and her doctorate in educational administration from the University of Texas in Austin in 1997.

As assistant vice president for student life, Dr. Hulme has played an integral part in the division's strategic planning, has supervised campus recreation, health services, wellness programs and the counseling center, and has chaired Baylor's task force on the residential life master plan. She attends Waco's Calvary Baptist Church. — *BN*

Baylor Success Center director named; University relations division revamped

Dr. Patricia Tolbert has been named to the new position of assistant vice president for academic development by Baylor President Robert B. Sloan Jr. Dr. Tolbert, who will report to Dr. Stan Madden, vice president for University relations, will be responsible for the Baylor Success Center, including academic development services, Office of Access and Learning Accommodation, Registrar's Office and career services.

"We are very excited about Dr. Patricia Tolbert joining our group as we form the Baylor Success Center," Dr. Madden said. "This undertaking has the potential to positively impact every student who comes through Baylor's undergraduate system in the years to come. She has had a succession of increasingly responsible and creative positions that have prepared her for this role, and we believe that she and her team will create a success center that will significantly improve each student's chance at success and opportunity for building their future."

Dr. Tolbert formerly served as director of student support services at Louisiana State University and has been a faculty member at LSU and Florida State University. At LSU, she was responsible for developing and implementing programs for at-risk students, monitoring retention and coordinating strategic planning for University College. She moved to Waco last year when her husband, Charles, was named chair of Baylor's Department of Sociology and Anthropology. She taught in the Baylor Interdisciplinary Core program during the 2000-2001 academic year.

A 1974 *cum laude* graduate of Baylor, Dr. Tolbert holds an MS in education from Baylor and a doctor of education degree from the University of Georgia. She has administered numerous grants and contracts and has written for a variety of educational journals and publications. She is a current or former member of the Council for Opportunity in Education, the Southwest Association of Student Assistance Programs, the College Reading and Learning Association and the Association on Higher Education and Disability.

Division reorganized

Dr. Madden also announced changes in two other areas of the University relations division. Larry D. Brumley, who has served for the past four years as associate vice president for communications, has been named associate vice president for external relations and has been given responsibility for church relations, governmental relations and youth programs. He also oversees Baylor's public relations office and KWBU-TV and KWBU-FM.

Diana M. Ramey, who has served for the past year as assistant vice president and director of admission services, has been named assistant vice president for enrollment management and has been given responsibility for the Office of Academic Scholarships and Financial Aid, in addition to admission services. Ramey has been an administrator at the University for 19 years. — *BN*

Dr. Tolbert

Horizons Program Keys on Vocation as Calling

Program fits 'perfectly' with University's Christian heritage and mission of preparing leaders for careers of service

continued from page 1

for faculty and staff to reflect on the meaning of vocation in their own lives and how best to communicate the language and culture of vocation to students and each other.

Some of these initiatives are new, such as establishing the positions of resident chaplains and director of student missions this summer. In other areas, the Lilly grant enhances existing programs, such as Baylor's longtime Chapel and student orientation.

The resident chaplaincy program began with the hiring of three George W. Truett Theological Seminary students who will serve as chaplains in Martin and North Russell residence halls and the Quadrangle Apartments. At least two more will be hired for Allen and South Russell, with all residence halls and Baylor-managed apartments expected to have resident chaplains within the next few years. Part of their responsibilities will be to provide pastoral care to students and to comfort students during times of tragedy. Their primary focus, though, will be helping students discern God's calling in their lives and careers, said Dr. Todd Lake, dean of chapel, a member of the Baylor Horizons steering committee and coordinator of the chaplaincy program.

"We are a Christian university and part of being a university is helping students figure out what direction God wants them to go," he said.

Student missions

The student missions director will play a key role in the Horizons program by developing mission trips for students that will combine their education with vocational opportunities. These might include computer science students writing computer code for Bible translation, education students teaching in bilingual and/or monolingual schools in the borderlands, or business students developing business plans for a cooperative of Asian farmers. The applications are limited only by one's imagination and discernment, Dr. Lake said.

In existing programs, such as Chapel and student orientation, Horizons' impact already is being experienced.

"Certainly we bring in some wonderful missionaries and preachers (to Chapel) like Anne Graham Lotz, Howard Batson, Duane Brooks and C.J. Oliver," Dr. Lake said, "but most of our students are not going to be called by God to become preachers or missionaries. They're going to be called by God into the area in which they are preparing at Baylor."

To strengthen the Chapel program, monies from the Lilly grant were used this spring to hire speakers who combine passionate Christian living with excellence in their fields. These included Nobel Prize-winning physicist William Phillips, ABC News religion correspondent Peggy Wehmeyer, the professional dance

company Ballet Magnificat! and actor Tom Key, who performed "The Cotton Patch Gospel." And the messages of these speakers weren't confined to Waco Hall, where Chapel is held. Truett Seminary student James Solomon, hired in January through Baylor Horizons as chapel coordinator, has worked to make Chapel guests available to a wider audience. As a result, this past spring speakers visited classrooms, spoke at student/faculty luncheons and gave free presentations to the Central Texas community.

Orienting students

Student orientation also has been restructured for fall 2001 with the help of the Lilly grant, said Dr. Eileen Hulme, acting vice president for student life. "One of the biggest changes is that we really highlighted our academic programs, so we get students thinking about what they're going to major in early on, which really is an issue of calling," Dr. Hulme said.

Although Baylor Horizons focuses on students, it also gives faculty and

Tom Harken, chief executive officer of Casa Olé Mexican restaurants, spoke at Chapel in 1998 and 2001.

staff opportunities to reflect on their vocations. In May, recent-hire tenure-track and other invited faculty members explored the relation of vocation to the liberal arts at Baylor. Dr. Lake, who participated in the seminar, helped lead worship and discussions with faculty members from the sciences, humanities, engineering and computer science. The discussions focused on appreciating God in the beauty of what one designs or discovers, he said, integrating faith without "shoe-horning your testimony in the middle of a class on thermodynamics."

"It's not that the specific technical task looks different if you're a Christian or not, but the feel of what you do is different if you view it as an act of worship. That's a wonderful privilege, to think God's thoughts after Him," Dr. Lake said.

Baylor Horizons also provides a Vocation and Faculty Formation grant program for faculty members who propose projects to enlarge the culture of vocation at Baylor. The first grants, totaling \$44,800, were awarded in May to 14 projects, from a cross-section of the University's schools, departments and institutes.

"In our accreditation and in our

Dr. Dub Oliver, left, dean for student development, greets a mother and daughter at an orientation session for new students this summer. Revision of the orientation process is one of the objectives of the Horizons program.

catalog we make reference to an engineering education within a caring Christian environment. We want to try to figure out what that means for us," said Dr. James Farison, chair of the engineering department, which will use its grant to study the "Integration of Christian Faith and Engineering Practice."

"Within our building, in our classes and in our contact with students, how do we stimulate the students to integrate their Christian faith, their engineering vocation and ultimately their sense of God's call as a Christian to that vocation?" he asked.

Departmental plans include sponsoring a Christian Engineering Educators Conference, studying the work of well-known engineers who are Christians, coordinating mission opportunities abroad that integrate students' service and education, and establishing informal discussion groups for engineering faculty and students.

Further exploration

Dr. Chris Kearney, associate professor of biology, also received a Horizons grant that will enable him to take a theology course at Truett Seminary. Dr. Kearney, who researches genetic engineering and genomics, hopes the course will lead him to further exploration in philosophy, history and psychology. By combining his scientific background with additional training in these fields, he hopes to be able to enhance his contribution to Christian scholarship and teaching at Baylor.

"It's important to have a certain breadth, especially in the sciences, and we've been trained in a certain way of thinking, which is quite different from the way most others have been trained," Dr. Kearney said. "By combining science and Christian studies, I think we can come up with ideas and ways of understanding how God works in natural systems in a very different sort of a way."

Baylor has a longtime relationship with Lilly Endowment Inc. The objective of the Indianapolis-based private foundation, which has supported the causes of religion, community development and education since 1937, is to assist colleges and universities in the development of new programs that

recruit and nurture a new generation of leaders for church and society. When Baylor was invited in April 1999 to submit a planning grant to Lilly under its new initiative "Theological Exploration of Vocation," it seemed a perfect match.

"This initiative fits perfectly with Baylor's mission, and we have an opportunity to be a national leader in promoting vocation as a calling," Baylor President Robert B. Sloan Jr. said in his State of the University address in April.

Once Baylor received the planning grant, four Baylor faculty members — Dr. Beaty, Dr. Lake, Dr. Jeter Basden, associate professor of religion and associate director of ministry guidance, and Dr. A.J. Conyers, professor of theology at Truett Seminary — wrote and submitted the implementation grant. The foundation informed Baylor on Oct. 6, 2000, that it was one of 20 colleges that received grants, which totaled \$39.7 million. Other church-related universities that received the grant include

Furman, Mercer, Notre Dame, Valparaiso, Boston College, Davidson,

Every career offers an opportunity to combine technical knowledge with a sense of ministry.

Earlham and Loyola of Chicago.

The Baylor Horizons project officially began in January 2001. At that time Kristen Sanford was hired as its program coordinator, a position jointly funded by the grant and the Baylor Institute for Faith and Learning. The daughter of missionaries and wife of assistant psychology professor Keith Sanford, she taught English to Baylor international stu-

dents last fall before assuming her duties with Horizons.

"I'm here because I see my own work as a vocation," she said.

For the next three years, Sanford will coordinate communication on all Baylor Horizons projects, handle budget issues and develop future resources. Once the three-year grant runs its course, several of the positions within the program will be funded by the University. Others, Dr. Beaty hopes, will be sustained through endowment or other internal resources.

Lilly's hope

"Many young people make pivotal decisions about their futures during college, and Lilly Endowment hopes that these promising new programs will ensure that Christian ministry is in the mix for them," said Craig Dykstra, vice president for religion at Lilly Endowment. "We also hope that they consider seriously their faith commitments as they make the career choices that seem best for them and then pursue their life interests."

Dr. Beaty said he believes the Baylor Horizons project ultimately will help develop a new generation of students, taught by faculty and staff well-versed in the Christian idea of vocation. They will be able to express in their various disciplines what it means to live one's life as a human being created in the image of God. Some will find their vocation within the agencies and ordained offices of the church, he said. Others will serve the church as laity, as leaders in business and teaching, as practitioners in medicine and social work, as teachers in Christian and secular schools, and as servants in many other callings.

"I think the more we tap into what motivates our students, we will see that

Baylor in Top 100 in degrees to Hispanics

Baylor again is ranked among the nation's top 100 colleges and universities awarding degrees to Hispanics in the latest rankings released by *The Hispanic Outlook in Higher Education*.

Baylor, ranked 85th in bachelor's degrees conferred upon Hispanics, was among five Big XII universities and 21 Texas schools receiving recognition in the national academic journal's top 100 published May 7. Last year, Baylor was ranked 87th.

Four-year colleges and universities that qualified for the ranking conferred 41,064 of their 289,752 bachelor's degrees to Hispanic students. That number represented a 6.8 percent increase over the previous year's total.

Baylor awarded a total of 180 bachelor's degrees to Hispanic students in 1998-1999, according to data gathered by the National Center for Education Statistics in the U.S. Department of Education. Baylor's Hispanic enrollment that academic year was 941 students among a total University enrollment of 12,987 students. In the 2000-2001 academic year, Baylor's total enrollment of 13,719 students included 967 Hispanic students. — BN

Organizational office appoints new director

Ashley Bean Thornton has been appointed director of Baylor's Department of Professional and Organizational Development. The department is responsible for providing professional development for University staff, as well as helping University departments to improve processes, procedures and organizational structures.

"Our purpose is to make Baylor a better place to work and a place where people can do better work," Thornton said.

Dr. Jeffrey Haldeman has been named senior organizational development generalist within the department. — BN

Regents OK Budget, 2 PhD Programs

Board elects three new members, officers for coming year; approves capital projects

Baylor's Board of Regents at its May meeting approved a \$260.7 million operating budget for 2001-2002, authorized new doctoral programs in philosophy and physical therapy and elected three new members to the Board.

Elected to three-year terms as Regents were Joseph B. Armes of Dallas and Tommy L. Bowman and Sue H. Getteman of Waco. Six current Regents were re-elected to three-year terms, including Dale Jones, Dallas; Joe E. Coleman, Houston; Will D. Davis, Austin; Ted L. Snider, Little Rock, Ark.; Laree Perez, Corrales, N.M.; and Neal T. Jones, Falls Church, Va.

The Board also elected officers for 2001-2002. John G. Wilkerson Jr. of Lubbock was re-elected chair of the Board, and Drayton McLane of Temple was re-elected vice chair. Two new vice chairs were elected — Billy Ray Hearn of Nashville, Tenn., and Charles D. Wise of Gatesville.

This year's budget, which took effect June 1, is a \$16.1 million, or 6.6 percent, increase over last year's budget of \$244.5 million. It includes a \$3.8 million increase in institutionally funded scholarships and fellowships and \$9.7 million for capital projects, including renovation of Morrison Constitution Hall, Martin Residence Hall and various other maintenance and minor renovation projects. Morrison Constitution Hall, home for Baylor Law School since 1955, will be remodeled to accommodate academic programs in the College of Arts and Sciences and selected interdisciplinary programs.

Two doctoral programs

A new PhD program in philosophy will admit its first students in fall 2003. It is expected to strengthen Baylor's undergraduate offerings in philosophy as well as the University's existing doctoral programs in the humanities. The five-year, 78-semester-hour program will emphasize the historical aspects of philosophy, particularly in relation to ethics and religion, and will include a teaching apprenticeship. The philosophy department currently offers master's and undergraduate degree programs.

This summer, Baylor will add a doctor of science in physical therapy (DScPT) to its programs at Brooke Army Medical Center in San Antonio. The DScPT will elevate the U.S. Army Orthopaedic Physical Therapy Residency program offered at the medical center from a certificate program to a degree program. The Army's only other residency program in physical therapy is offered at the U.S. Military Academy at West Point. Baylor also offers a master's degree in health care administration and a master of physical therapy degree at Fort Sam Houston in San Antonio. The University's health care education programs in San Antonio date to 1951.

New Regents named

New Regents Armes, Bowman and Getteman took office June 1. Armes serves as executive vice president and chief financial officer for Southwest Sports Group LLC and Southwest Sports Realty LLC in Dallas and holds bachelor's and master's degrees in business administration from Baylor and a JD from Southern Methodist University. He formerly served as executive vice president and general counsel of Suiza Foods Corp. and vice president and general counsel of The Morningstar Group Inc. He previously served on the Baylor Foundation Board of Directors. He is on the Hankamer School of Business Advisory Board. He and his wife, Kelly, who also earned a BBA from Baylor, are members of Park Cities Baptist Church in Dallas and have two children, Annie and John.

Bowman is director of Linehaul, Central Freight Lines Inc. He earned a bachelor of arts degree in business from Baylor in 1971 and was a

Armes

Bowman

Getteman

Fleet. Bowman has served on the boards of the Waco Chapter of the American Red Cross, YMCA and City of Waco Parks and Recreation. He and his wife, Jacqueline, are members of First Baptist Church, NBC, where he serves as a deacon/trustee and Sunday School superintendent. They have two children, Tommy Jr. and Krystal.

Getteman earned a bachelor of education degree from Baylor in 1950. She and her husband, Ted, also a Baylor graduate, received the Waco Philanthropists of the Year Award for 2000 from the Central Texas Chapter of the National Society of Fundraising Executives and the Distinguished Service Award from Hillcrest Baptist Medical Center in 1999. She served as the co-chair of the first

Junior League Charity Ball and is a former president of the Junior League of Waco. Her other community service includes formerly serving as treasurer of the Oakwood Cemetery and past membership on the boards of the United Way, Waco Girls Club and the Regis-St. Elizabeth. The Gettemans have

shown their commitment to the University by establishing scholarships in business and music. They also provided the largest gift in Baylor women's athletics, resulting in Getteman Softball Stadium for the Lady Bears. Getteman is a member of Columbus Avenue Baptist Church, where she has taught Sunday School and served on the building committee. The Gettemans have two sons, Louis III and Holt, also a Baylor graduate.

In other action, the Board of Regents adopted a resolution of appreciation for Robert Reid, professor emeritus of history and Master Teacher, who has presented a series of Baylor historical vignettes at recent Regents meetings. — BN

Commencement Congratulations

Best wishes to the following Baylor employees and children or spouses of Baylor faculty and staff who graduated from the University in May.

Hankamer School of Business

Bachelor of Business Administration

- Jeff Anz — husband of Susan Anz, accounting operations
- Kevin Dobbs — son of Teri Dobbs, student financial aid
- Keith Albert Helpert — son of Bernice Helpert, Arts and Sciences
- Becky Moore — residence life
- Blake Rowe — son of Frank (Pete) Rowe, athletics
- John Weeks — son of Bill Weeks, Hankamer School of Business

College of Arts & Sciences

Bachelor of Arts

- Paige Cunningham — daughter of Don Cunningham, Hankamer School of Business
- Allison Farr — daughter of Patricia Norman, Hankamer School of Business
- Russell Krumnow — son of Sharon Krumnow, Albritton House

Bachelor of Fine Arts

- Stephanie Doak — daughter of Jim Doak, Department of Public Safety, and Donna Doak, University development

Bachelor of Science in Family and Consumer Sciences

- Julie Kendig — daughter of Vicky Kendig, continuing education
- Elizabeth Hambrick — daughter of Doriss Hambrick, student campus life
- Kylie Lindsey — daughter of Tom Lindsey, Controller's Office

School of Education

Bachelor of Science in Education

- Julie Baker — daughter of Gloria Baker, admission services
- Courtney Etheridge — daughter of Donna Etheridge, libraries
- Trent Huey — son of James Huey, athletic development

Graduate School

Master of Social Work

- Rebekah Coenen — wife of John Cunningham, communication studies
 - Elissa Madden — daughter of Charles S. Madden, University relations
- Master of Science in Communication Sciences and Disorders
- Doriann Beverly — daughter of Pearlle Beverly, student activities

Master of Arts

- Lance Grigsby — journalism

Master of Accountancy/Bachelor of Business Administration

- John Hillman — son of Kathy Hillman, libraries

Master of Business Administration

- Jonathan Purdy — son of Rita Purdy, family and consumer sciences
- Tracy Booth — wife of Bill Booth, Information Technology Services
- Janis Hunter — student financial aid

List compiled and provided by the Office of Human Relations

Two Master Teachers Share Insights to Their Profession

Called to Serve: John

By Dr. Robert G. Packard
Professor of Physics and Master Teacher

Editor's Note: Dr. Robert G. Packard was selected by this year's senior class as the Collins Outstanding Professor. He delivered the Collins Lecture, titled "Poverty Physics: The Physics of the Egg," on campus April 26. A professor at Baylor for 49 years, his "Packard Physics" class is nearly a rite of passage for most Baylor freshmen. He shares the following essay with BaylorNews.

*I shall pass through this world but once;
If therefore there is any good thing I can do
Or any kindness I can show,
Let me do it now.
Let me not defer it nor neglect it,
For I shall not pass this way again.*

Author Unknown

The following story is true, but to prevent conjecture about his identity, I shall call him John. At the time of this story, Baylor faculty members advised an assigned group of freshmen. John was my student. He brought his enthusiasm, dreams and future plans to me. We talked about his career choices, high school adventures, teachers and class schedules. From time to time, John reappeared to share some concerns about his grades. We discussed study methods and skills for taking tests. Sometimes he would be part of a group requesting information about the advantages of pledging a fraternity.

John returned early to school in the fall and came for advising and announced he had decided to go through fraternity rush. He was accepted as a pledge and briefly enjoyed being part of the pledge class.

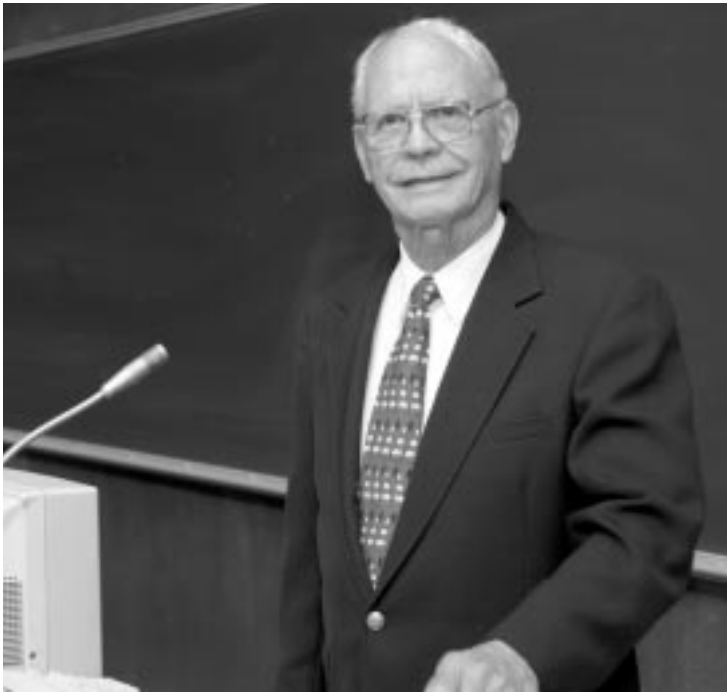

The next time I saw John he was a different person. He came to the office in tears. He had become ill, and the doctor and his parents insisted he reduce his physical activities, especially pledging. John withdrew from his pledge class and returned to his previous social and academic life.

Belew Art Collection at Martin

The John S. Belew art collection will be on display through July 20 in the University Art Gallery at Baylor's Hooper-Schaefer Fine Arts Center. The collection is part of the Martin Museum of Art permanent collection.

Formed in 1991 to honor Dr. John Belew, who was retiring as Baylor provost, the collection features 15 works of art, from ceramics to sculpture to pieces created as part of the art education program. Each tenured or tenure-track faculty member in the art department was asked to donate a piece of his or her work.

For more information, contact the art department at ext. 1867. — BN

2001 Collins Professor

Only a few weeks passed before a midnight call came from John's parents. He was in the hospital, partially paralyzed. They asked me to meet them at the hospital. We waited anxiously for the attending physician to come from the examination room. The parents informed me then that John had a tumor removed from his brain in high school. At that time, the prognosis had been that he would recover with no ill effects. When the attending physician came out, he reported that John had inoperable brain cancer. Cobalt 60 would be used to shrink the tumor and hopefully prolong his life.

The parents were faced with the choice of letting John remain at Baylor or taking him home. You could sense the agony of this decision but both agreed that he should remain at Baylor. They asked me to watch John until he reached the point when he must return home. I agreed, but this awesome responsibility presented problems on how I could monitor his health. He was a student and it would be impossible for me, a teacher, to visit his room or call periodically. I then recalled that the last time I visited with John, he mentioned his desire to pledge the fraternity again. It occurred to me that his former pledge brothers could help. I called two of his friends to my

office, where I explained John's condition. I told them of my promise to his parents and that they could help me. They agreed to give me a weekly assessment of his health.

For a few months John was unusually happy and did well in his academic work. I seldom saw him because he now was an active Baylor student. I continued to pray daily for his recovery, but just as I felt he was making progress, his condition worsened. The roommates told me he was tiring easily and sleeping for longer and longer periods. I called his parents and reported his latest condition. They felt that it was time for John to come home.

John died without returning to Baylor. It was a sad time for me. As I walked around the campus, the memorial lamps had a new significance. Many of the Baylor students were victims of war, accidents or diseases. This poem by Rupert Brooke expressed the pain I felt.

*The years had given them kindness. Dawn was theirs,
And sunset, and the colours of the earth.
These had seen movement, and beard music; known
Slumber and walking; loved;
gone proudly friended;
Felt the quick stir of wonder; sat alone;
Touched flowers and furs and cheeks. All this is ended.*

This is not the usual paper one would expect from a Collins recipient. I wanted to show another side of Baylor professors. They go through emotional periods of trying to help students with a wide range of problems, many outside the academic setting. I accept this honor as a representative of those whose services and love for students goes unrecognized. They have truly flung their "Green and Gold Afar."

For more information, contact the art department at ext. 1867. — BN

What We Have Loved

By Ann V. Miller
Professor of English and Master Teacher

Editor's Note: Professor Ann V. Miller retires this year after teaching at Baylor for several decades. She was one of the first two professors to be honored by the University with the distinction of Master Teacher in 1981. Beloved by generations of students, Professor Miller shared in brief her philosophy of teaching in an essay published in the July/August 1991 issue of Baylor Line, reprinted here with permission.

A valued colleague once said he thought teachers ought to have nine lives: In the first eight, we'd need to learn everything; in the last, we might be able to teach. For sure it's a lifelong study — learning what to do in the classroom — and the philosophy is probably all in the doing.

Young, I wanted the students to know how much I knew, which was very little. I didn't encourage questions because I had neither the "answers" nor the confidence to admit I didn't know. Years of study brought the confidence, but the shift toward a more Socratic method of teaching came about as a direct result of a weeklong Danforth Associates conference at the University of Chicago. On the last day we observed a "model" class: a renowned professor and a handful of carefully selected students, who had been assigned the Crito Dialogue. After a few summary remarks, the professor dropped a pivotal question. The class struck fire. They countered with questions, argued and defended positions. It was all open-ended, no finalities. But how much we had understood.

I knew that simulated class for what it was — straight out of Utopia. I couldn't see that method working with a class of 40 Baylor undergraduates. But the next summer's reading of Jacob Bronowski's *The Ascent of Man* convinced me it was worth a try. Certainly the book has nothing to do with teaching methodology. It traces the intellectual history of man's discoveries. What struck me most forcefully as I read it, though, was that these great strides in science were made by men and women who dared to question the prevailing assumptions. One brief passage stays with me: "It is important that students bring a certain ragamuffin, barefoot irreverence to their studies; they are not here to worship what is known, but to question it."

I still believe in the lecture. But I count that day good when students pose the right questions and thus involve themselves in discovery, that most exhilarating of experiences. Gradually they may realize that they need not sit with pens poised to take down what the

professor says; rather they can begin to reason, to imagine, to develop their own critical faculties. Having studied the assignment, we both have the same evidence. I have more experience; they are bright students, and they see things freshly. It's a winning combination.

I used to expect students to be where we are. I have come to understand, through sponsoring a number of student organizations, just how many activities engage their time, how many hours of service many of them give to church and community, how easy it is now for them to center their lives off-campus. But I still expect them to be in class, regularly. An old-fashioned notion, to be sure; eventually it may be discarded. But not by me. I find a high correlation between attendance and grades.

My assignments are more modest than they once were. But they remain challenging, and students are expected to do the assigned work. I respect the students; they seem to return this respect. I care deeply that they learn, and I feel strongly — even passionately — about my subject. Students quickly learn that the articulate use of language, written and spoken, is one of the vital and humanizing processes. The more precise their language skills,

the better their professional and personal lives will be.

As for literature, I am honest with students about what it does and does not do. Far from being the "whipped cream" that many think it, poetry deals with what Yeats calls the "rag-and-bone shop of the heart": the pain and joy, hope and despair of life, its greed and generosity, love and the failure of love, age, death. Good literature conveys this knowledge feelingly. And feelings are as common, as essential, as bread. The poetry voices what we cannot say for ourselves; Louis Untermeyer defines poetry as "an attempt to express the inexpressible in unforgettable ways."

We owe an enormous debt to the past, but we live in the present. We teach today's students. They need a sense of history in all the disciplines, a sense of connection to the past as well as vision for the future. I am fortunate to have enjoyed all my life the study of literature — classic, modern, contemporary. I am doubly fortunate to be able to share what I have loved. As Wordsworth puts it, "what we have loved, others will love, / And we will teach them how . . ."

Communications Award to 'Baylor Voice' Fallon

Baylor broadcasting legend Frank Fallon will be presented with the 2001 Baylor Communications Award during the annual President's Media Luncheon Aug. 29 in Barfield Drawing Room in the Bill Daniel Student Center.

The Baylor Communications Award was established six years ago to honor those individuals who have distinguished themselves in the field of communications and in their communities.

Known for his unmistakable voice, smooth delivery and immense knowledge of the games he announced, Fallon spent 43 years as the "Voice of Baylor" for Baylor football and basketball games, 45 years broadcasting Texas high school football regular season and playoff games around the state and two decades as the public address "Voice of the NCAA Final Four."

He also did several years of Southwest Conference basketball play-by-play on television for NBC and ESPN. In addition, Fallon was general manager of KWTX Radio in Waco for 29 years and Baylor's coordinator of broadcast activities from 1983-1994. He has taught broadcast journalism at Baylor since 1984.

Born in Knoxville, Tenn., Fallon graduated from Alamo Heights High School in San Antonio and later earned his degree from Baylor in 1953. He has received numerous honors throughout his illustrious broadcasting career, including being voted to the Texas Sportswriters Association's list of "Top 10 All-Time Radio Play-by-Play Announcers"; five-time Texas Association of Broadcasters (TAB) Sportscenter of the Year; seven-time Associated Press Best Radio Play-By-Play Announcer; member of Baylor Hall of Honor; inductee into the Texas High School Football Hall of Fame; and honorary member of the Texas High School Football Coaches Association. An "Inside Baylor Sports" special on Fallon's career that aired in December also was an award winner. The program was honored with a 2000 Telly Award that showcases outstanding non-network and cable video productions.

The Waco Chamber of Commerce presents the annual Frank Fallon Sportsmanship Award that recognizes the individual who promotes basketball and sportsmanship in McLennan County.

Fallon and his wife, June, have been married 50 years. They have four sons: Steve, Mark, Mike and Kyle. — Lori Scott Fogleman

Muddied but Unbowed Victors

Rugby club brings home Division II national trophy

The men's club rugby team brought home to Baylor in May a coveted national championship title, beating out a late-game rally to emerge as USA Rugby Collegiate Division II National Champs.

In the club's first appearance in the division's championship play, Baylor defused a furious Arkansas State rally to defeat the Indians 29-16 at Sportsplex Stadium in Virginia Beach, Va. The team's championship trophy is on display in the McLane Student Life Center.

"The entire trip was just amazing," said wing Kenny Johnson, a senior information systems/management major from Rogue River, Ore., and the club's treasurer. "We won the state championship and then the Western championship, which was further than any team from Texas had ever gone before."

Tournament play

Johnson said the national championship title was particularly sweet for him and team captain Zach Oliphant, a pre-med/business major from Tomball. The seniors have been on the rugby team since their freshman year and remember well that first campaign four years ago when Baylor lost every game.

"To go from 0-8 our freshman year to winning a national championship our senior year is an unbelievable feeling," Johnson said.

After winning the Western championship over North Carolina, third-seeded Baylor advanced to the National Elite Eight and Final Four in Reno, Nev., where wins over Salisbury State (Maryland) and Claremont College (California) sent them to the national championship match against Arkansas State. The Indians, seeded fifth in the tournament, had defeated Providence and top-seeded University of Nevada-Reno to reach the final.

"We played several close games throughout the season, including the Salisbury State game, when we were down until the last few minutes. That really built a lot of character in our team," Oliphant said. "It's hard to describe how you feel when you win. You think of all the great players you've played with, all the hard work, the blood. All of it finally paid off."

Several Baylor rugby team members also will get some international playing experience this summer on an all-star team touring South

The Baylor rugby club poses after a tough — and muddy — game, above, and rallies around the national trophy, left. This year the club competed against Texas A&M, Southern Methodist University, Rice, Louisiana State University and Stephen F. Austin in Division II of the Texas Rugby Union before advancing to state and regional play. Rugby is one of 19 club sports sponsored by the University.

Africa. Baylor will begin the defense of its national title in September.

Baylor students participate in 19 club sports, said Robert Graham, assistant director of campus recreation and sport club coordinator. Graham has worked with the rugby club since his arrival at Baylor two years ago.

"It was really fulfilling to see them win because they have taken ownership of their program," Graham said. "They're very organized, they practice hard, they cleaned up the field at Edgefield Park and even put up their own goal posts (which were purchased by Baylor). They finished ninth in the nation last year, so it was nice to see them take that extra step by winning the national championship."

The clubs, involving sports from badminton to

weightlifting, are student-run and student-led, although Baylor does help fund some expenses, particularly travel, Graham said. Each team also participates in leagues and conferences with familiar foes such as Texas A&M, Texas and Texas Tech. Baylor rugby competes in the Texas Rugby Union at the Division II level against opponents Southern Methodist University, A&M, Rice, Louisiana State University and Stephen F. Austin.

Baylor's club rugby team is sanctioned by USA Rugby, the national governing body for rugby, and is a member of the U.S. Olympic Committee and the International Rugby Board. USA Rugby began holding the Division II Championship in 1998. — Lori Scott Fogleman

Dr. Jeffrey

Professor of the Year in 1995 and elected Fellow of the Royal Society of Canada in 1996.

A noted scholar in medieval studies and the Bible and literature, Dr. Jeffrey is the author or editor of 12 books, including *People of the Book: Christian Identity and Literary Culture*, named one of *Christianity Today's* Top 10 Books of 1997.

— BN

Jeffrey Named Associate Provost

Dr. David Lyle Jeffrey, Distinguished Professor of Literature and Humanities at Baylor, was appointed associate provost by President Robert B. Sloan Jr., effective June 1.

In the newly created position, Dr. Jeffrey will work with Provost Donald D. Schmeltkeopf on the recruitment of new faculty, particularly University and Distinguished Professors. He also will be a resource and mentor for junior faculty in the development of their scholarly objectives.

"I am very pleased that Dr. Jeffrey will be assisting deans and department chairs in the identification of prospective outstanding scholar-teachers to join the Baylor faculty," Dr. Schmeltkeopf said. "He is a highly respected scholar and has extensive contacts with academics all over the world."

Dr. Jeffrey, who will continue to serve as Distinguished Professor and maintain his office in the English department, joined the Baylor faculty from the University of Ottawa in fall 2000. He

Two-Part Photo Exhibit Showcases ABL History

Library hosts displays for Jubilee celebration

A pictorial history of Baylor's Armstrong Browning Library is on display in the library's Hankamer Treasure Room. The photos represent a timeline, detailing library founder Dr. A.J. Armstrong's early days as chair of Baylor's English department to the completion and success of his lifelong project to construct the Armstrong Browning Library, which houses the world's largest collection of Robert and Elizabeth Barrett Browning memorabilia.

Rita S. Patteson, curator of manuscripts at the library, said the photo exhibit is being presented in two parts. The first exhibit was on display through June 29 and highlighted the dramatic growth of Baylor's Browning materials and Dr. Armstrong's dedication to the project.

Growing collection

"Over the years, the collection grew, quite literally, from a shelf, to an alcove, to a room (in Carroll Library), to an entire building," Patteson said. "The first exhibit progresses through 1950 to the groundbreaking and construction of the \$1.75 million library. It also features major events, such as visits by the celebrities who were brought to Baylor and the Browning collection by Dr. Armstrong."

Patteson said that between 1908

and the 1950s, more than 550 international celebrities were welcomed by Dr. Armstrong to campus, including former President William Howard Taft, famous Antarctic explorers Capt. Roald Amundsen and Adm. Richard E. Byrd, and stars of the stage and screen, including Katharine Cornell and Basil Rathbone, who performed in a production of "The Barretts of Wimpole Street" on the Baylor campus in 1934. Other visiting celebrities included Western adventure writer Louis L'Amour and radio personality Paul Harvey.

Library dedication

The second photo exhibit, scheduled for July 2-Sept. 29, includes pictures of the dedication of the library on Dec. 1-3, 1951, along with coverage of historic events during the building's first half-century. Dr. Armstrong died March 31, 1954, two days after his 81st birthday.

The photos have been selected from the library's extensive archives. The complete collection of about 50 pictures from the two exhibits will be displayed during the library's Golden Jubilee celebrations this October. A full program of events is planned, including a three-day international conference Oct. 11-13 titled "The Prize is in the Process." The conference will feature a panel of distinguished Browning

scholars from the United Kingdom, Canada and the United States.

A banquet is scheduled Oct. 12 and a performance by American soprano Frederica von Stade will be Oct. 13. On Oct. 14, a memorial wreath will be placed on the Armstrong family grave in Waco's Oakwood Cemetery, followed by a cornerstone ceremony at the library and a service of rededication.

Two copper boxes installed during the 1950 cornerstone ceremony will be opened. Patteson said they are believed to contain more than 60 items ranging from personal photographs and publications to tributes to Robert Browning. — Alan Hunt

Dr. A.J. Armstrong takes T-square and level in hand during construction of the library, upper left, and receives a rare, first edition of *Pauline*, Robert Browning's first work, from Mrs. Abner P. McLendon, upper right. The Browning Room, created in 1924, as it looked in Carroll Library.

Tickets Go on Sale in August for 'Mitford' Author Karon's Fall Lecture

Jan Karon, the author of the best-selling "Mitford" series, will visit the Baylor campus in October as the inaugural guest author of the Baylor Libraries' Distinguished Author Lecture Series.

Karon will talk about her writing and the characters who live in the fictional North Carolina town of Mitford during a lecture and slide show at 7 p.m. Oct. 18 in Waco Hall. The event will be followed by a special patron reception with Karon in Armstrong Browning Library. Tickets go on sale Aug. 1 at the Bill Daniel Student Center ticket office and are \$10 for students, \$15 for general admission and \$50 for patrons.

Karon's books, autographed bookplates and commemorative posters will be available for purchase at the event. All proceeds will be used to provide additional student resources and facilities in the libraries.

"Jan Karon and her 'Mitford' series have captivated readers across the country," said John Wilson, associate professor, documents librarian and library development coordinator. "She is an ideal fit for

Baylor, so we and the libraries' Board of Advocates are honored and excited to host her for the Inaugural Distinguished Author Lecture Series."

With a writing style often compared to James Herriot, Bailey White and Garrison Keillor, Karon's six novels capture the "foibles and delights, the mysteries and miracles" of Mitford's hilarious cast of characters, all under the watchful eyes of Father

Tim Kavanagh, the long-suffering village rector. *At Home in Mitford*, Karon's first book in the Mitford series, was nominated for an

ABBY by the American Booksellers Association in 1996, 1997 and 1998. Her sixth and latest in the series, *A Common Life*, topped the *New York Times* bestseller list in June, and a seventh Mitford novel, *In The Mountain*, is scheduled to be released in fall 2002.

In the meantime, Karon's fans can savor two gift books available this fall, *Patches of Godlight: Father*

Tim's Favorite Quotes and The Mitford Snowmen: A Christmas Story. She also has written two children's books, *Jeremy: The Tale of An Honest Bunny* and *Miss*

Fannie's Hat.

Wilson and the Board of Advocates, a group that promotes awareness of the libraries and assists in fundraising and other outreach programs, hope that the Distinguished Author Lecture Series will familiarize Central Texans with the libraries and the resources provided to the community. They expect more than 2,000 people to attend Karon's lecture.

For more information about the lecture series or about library development, contact Wilson at ext. 3457. For ticket information, call the Bill Daniel Student Center ticket office at ext. 3210. — Lori Scott Fogleman

Family Circle

Best wishes to

The following people who are recovering from surgeries:

Cyndi Ballew-Patton, Dean of Chapel's office;

Dr. John T. Baughman, career services; **Dr. James M. Bennighof**, School of Music;

Dr. O. Herbert Colvin, School of Music; **Margaret L. Davis**, former lecturer in English;

Dr. Clement T. Goode, professor emeritus of English;

Jeanne Nowlin, associate athletic director; and

Carl Snow, husband of **Frances E. Snow**, associate professor emeritus of nursing.

The following people after recent hospitalizations:

Tommie Lou Flanders, wife of **Dr. Henry Jackson Flanders Jr.**, professor emeritus of religion;

Brenda Ramey, Alumni Association; **C.L. Reed**, former co-manager of Baylor Book Store; and

Dr. Larry D. Vanlandingham, School of Music.

Dr. Michael B. Frisch, psychology, who is recuperating from a traffic accident.

With sympathy to

Dr. Bruce Gordon, Institute for Faith and Learning, on the death of his father, Kenneth Douglas Gordon.

The family of **Helen H. Lake**, former chair and associate professor emeritus of business communication/education, on her death.

Nancy Pedersen, Baylor Libraries, on the death of her father, Heber C. Parker.

Debi Campbell Perry, public relations, on the death of her father, Bill Campbell.

Kay Wellbaum, Baylor Libraries, on the death of her mother, Augusta Stengel.

Congratulations to

Margaret Kramer, communication studies, on the birth of her granddaughter, Brinley Maryn Smith.

Dr. Ralph Lynn, professor emeritus of history, on his marriage to Dorothy Diddie.

Presentations & Participations

Dr. Jesse T. Airaudi, senior lecturer in English, presented "Intellectual Media Response to the 'People's Princess' Phenomenon: The Contest of Ideology and Imagination" April 11-14 at a Popular Culture/American Culture Associations' conference in Philadelphia.

Dr. Dwight D. Allman, assistant professor of political science, presented "Citizenship as Care of the Soul: Socrates' *Apologia*" April 24 at a political theory convocation at Texas A&M University.

Janet H. Bagby, senior lecturer in educational psychology, presented "A Guide to Resources for Planning and Operating After-School Programs: A New Publication" at a Southwest Educational Development Laboratory conference in Albuquerque, N.M.

Betty Ruth Baker, assistant professor of curriculum and instruction, presented "Planning Transitions: Valuable Strategies in Classroom Management" in March at the Southern Early Childhood Association annual conference in Little Rock. She presented "Using Fingerplays with Young Children: From Froebel Until Now" in April at the Association for Childhood Education International annual conference in Toronto.

Dr. Clark Baker, assistant professor of journalism, had photographic work accepted for juried national exhibition at Photospiva 2001 in April at the Center for the Arts in Joplin, Mo.

Dr. Elden R. Barrett, professor of curriculum and instruction, presented "Legal Issues for Preservice Teachers" Feb. 18-21 at the Association of Teacher Educators annual conference in New Orleans. He was appointed chair of the fiscal affairs committee and re-elected chair of the classroom management special interest group at the conference. He participated in a panel discussion titled "Student Teaching Options in Other Countries: Rationale, Processes, Opportunities" March 1 at the American Association of Colleges for Teacher Education annual meeting in Dallas.

Dr. Michael D. Beaty, director of the Institute for Faith and Learning and professor of philosophy, presented "Faith, Virtue and Citizenship" April 7 at a Society of Christian Philosophers regional meeting at Westmont College in Santa Barbara, Calif.

Dr. Rodney Bowden, assistant professor of health, human performance and recreation, presented "What Do Health Educators Do?," "Walking Billboard: Should Health Educators Practice What They Preach?" and "The 'Skinny' on Fad Diets" Nov. 29-Dec. 2 at a Texas Association of Health, Physical Education, Recreation and Dance conference in Dallas.

Sharon Johnson Bracken, managing editor of *Entrepreneurship Theory and Practice*, and **Dr. Kyle V. Cole**, assistant professor of journalism and director of graduate studies, co-presented "Journalistic Stereotypes' Influence on Perception of Journalists and Journalism: A Cultivation Analysis" Nov. 2-4 at a Southwest Education Council for Journalism and Mass Communications symposium at Arizona State University in Tempe, Ariz.

Dr. Marianna A. Busch, chair and professor of chemistry and biochemistry, and **Dr. Kenneth W. Busch**, professor of chemistry, presented a co-authored paper titled "Laboratory Studies on Magnetic Water Treatment and Their Relationship to a Possible Mechanism for Scale Reduction" March 29-31 at a

Water Quality Association meeting in Orlando, Fla. They presented a co-authored paper titled "Forays into Analytical Spectroscopy" May 11-12 at an American Chemical Society Florida section annual meeting, also in Orlando.

Dr. Robert C. Cloud, professor of educational administration and health, human performance and recreation, chaired a Texas Higher Education Coordinating Board certification committee visit March 4-5 to The Art Institute of Houston. He facilitated a retreat in February for administrators of the University of Mary Hardin-Baylor.

Dr. Robert G. Collmer, Distinguished Professor Emeritus of English, presented "Cadiz, Donne and Cervantes" April 5-7 at a South-Central Renaissance Conference meeting at Texas A&M University in College Station. He presented "Memories of the 1596 Asalto Ingles on Cadiz" May 22-26 at a Mediterranean Studies Association meeting in Aix-en-Provence, France.

Dr. W. Dale Connally, assistant professor of health, human performance and recreation, presented "Philosophy and Theology of Recreation and Sports Ministry;" "Organizing for Recreation and Sports Ministry" and "The Meeting of the Bored: How to Have Led More Effective Meetings" Feb. 25-March 1 at a Recreation Lab church recreation training conference in Glorietta, N.M.

Dr. William V. Davis, professor of English and Writer-in-Residence, served as a judge for the Natalie Onishik Poetry Award, presented March 31 by the Texas Institute of Letters in Dallas. He also served as a judge for a student poetry contest at Cameron University in Lawton, Okla.

Dr. Jeannette M. Denton, assistant professor of English, presented "A Relative Chronology of West Germanic Consonant Gemination" April 21-23 at a Germanic Linguistics annual conference in Banff, Alberta, Canada.

Dr. Preston Dyer, professor of social work, presented "Premarital Counseling and Marriage Enrichment as Primary Prevention" April 5-6 at a Texas Council on Family Relations conference in Dallas. He also participated in a marriage education panel at the conference. He co-presented "Why Marry?" April 6 at a Waco Youth Council conference in Waco. Co-presenter was **Dr. Genie Dyer**, part-time social work lecturer.

Dr. James B. Farison, chair and professor of engineering, presented a co-authored paper titled "Bit-Map Generation for Black Truncation Coding by Artificial Neural Network" Nov. 21 at the international Conference on Computer Graphics and Imaging in Las Vegas. Co-author is Dr. Mahmoud Quweider, University of Texas-Brownsville. Dr. Farison also chaired a session on image segmentation, coding and compression and served on the international program committee at the conference. He served on the Outstanding Gulf Southwest Section Campus Representative Award selection committee March 28-30 at an American Society for Engineering Education conference at Texas A&M University in College Station.

Dr. Kevin J. Gardner, assistant professor of English, presented "Richard Steele, the Scribblers and the Hanoverian Crisis of 1714" April 19-22 at an American Society for Eighteenth Century Studies national meeting in New Orleans.

Dr. Diana Garland, chair and professor of social work, presented "Family Ministry" Jan. 19-20 at a

Christian Education Association conference in San Antonio. She led family life seminars and preached Feb. 9-11 at Providence Baptist Church, Charleston, S.C., and Feb. 23-25 at Kirkwood Baptist Church in St. Louis. She presented "Families and Faith" and "The Integration of Faith with Social Work Practice" March 30 at Bethel College in St. Paul, Minn. She delivered the N.W. Carpenter Lecture April 5 at Mississippi College in Clinton, Miss. She presented a keynote address titled "Young Lives in the Balance: Articulating a Theology for the Church's Ministry with Children at Risk" April 27 at the Social and Systemic Approaches for the Church with At-Risk Children conference in Austin.

Dr. Charles M. Garner, associate professor of chemistry, served as a judge for the Dallas-Fort Worth Meeting in Miniature April 20 at Tarleton State University in Stephenville.

Dr. Nikolas K. Gvosdev, associate director of The J.M. Dawson Institute of Church-State Studies and assistant professor, presented "Church-State Relations in Russia" Jan. 19 at Georgetown University in Washington, D.C. He presented "The State, the Schools, the Press and Matters of Ecclesiology: Making the American Experience Relevant for Ukraine" May 24-25 at the Institute of Philosophy of the National Academy of Sciences in Kiev, Ukraine. He presented "Views of American Orthodox on the Problem of Ecumenism" May 29 at a conference on "Ecumenism and the Problem of Interconfessional Dialogue" in Kiev, Ukraine.

Dr. Carole A. Hanks, associate professor of nursing and director of the pre-nursing program, Waco campus, had a co-authored paper titled "Enduring Effects of Nurse Home Visiting on Maternal Life-Course and Child Development: A Randomized Trial with African-Americans" presented April 21 at a Society for Research in Child Development biennial meeting in Minneapolis. Co-authors are H. Kitzman, K. Sidora and R. Cole, University of Rochester.

Anna Kay Hollon-Harris, associate registrar, presented "Prerequisite Checking on SIS at Baylor University" April 21 at an American Association of Registrars and Admission Officers meeting in Seattle.

Dr. Susan K. Johnsen, associate professor of educational psychology and associate dean for scholarship and professional development, presented "Designing Problem-based Curriculum for Gifted Students" and "The Secret Life of Gifted Students: Independent Study" Nov. 18 at an Association of San Diego Educators for the Gifted meeting in San Diego.

Dr. Mary L. Klingman, senior lecturer in English, conducted a workshop for directors and teachers of English as a Second Language programs March 31 in Waco.

Dr. John R. Knue, lecturer in information systems, planned and produced the program for the Texas Distance Learning Association annual conference March 28-31 in Houston.

L. Scot Lahaie, lecturer in theater arts, presented "On the Nature and Purpose of Christian Art" March 30 at the Christ and Culture annual conference at the University of Memphis.

Dr. Ute S. Lahaie, assistant professor of German and language laboratory director, presented "Influences of German-speaking Immigrants upon Life in Waco and Central Texas from 1846 until Present" April 7 at a joint convention of the Texas-German Society and German-Texan Heritage Society in Waco.

Dr. Eric C. Lai, assistant professor of music theory, presented "Re-merger in Twentieth Century Composition and Beyond: The Music of Chou Wen-chung" April 20 at a conference titled "Blurring

The man with the badge

Top-secret census research comes with high-level security clearance

He has a security clearance and a badge, uses passwords and a building access code and is unable to reveal much about his work. But Baylor sociology and anthropology chair Charles Tolbert is not moon-lighting as a spy for the CIA.

Dr. Tolbert goes through this kind of security process because he is one of a few academics who regularly travels to the U.S. Census Bureau in Washington, D.C., to view confidential research data from the economic and population censuses that never will be made public. This is work that only can be done at the bureau or at one of five regional data centers, none of which is located near Texas.

"There are about 50 people who have the clearance to conduct research at the Census Bureau," Dr. Tolbert said. "Some of these are from governmental agencies, such as the Federal Reserve and the Justice Department, and some are academics from places like Johns Hopkins, UCLA, and Penn and other Ivy League schools."

Dr. Tolbert became interested in data analysis using census tools while an undergraduate at Baylor. During his faculty days at Florida State and Louisiana State universities, he performed research using publicly available census data, often for government agencies such as the U.S. Department of Agriculture and the Department of the Interior. That research brought him to the attention of the Census Bureau.

"I struck up an acquaintance with Alfred

R. Nucci, who is at the bureau, who had heard one of my paper presentations," Dr. Tolbert said. "He told me that I was doing really interesting things with the publicly available data, and that I could really push the envelope with some of the stuff they have behind the scenes."

Multistep process

Dr. Tolbert learned that receiving a research seat at the Census Bureau is a multi-step task. First, his proposal was peer reviewed and he received funding for the research from various agencies, including the National Science Foundation. Then he wrote a similar proposal to the Census Bureau affirming he had money for his research and would like to buy access.

"It took a year and a half for everything to fall into place," he said. "I actually started going to the bureau in 1998 and my work is funded through 2004. But I have other proposals out there that could add some years to my research."

After his proposal was accepted, Dr. Tolbert underwent an extensive background check, was fingerprinted, sworn in and issued a badge, which he must wear at all times at the bureau.

"The badge is literally the key to the facility, and in the not-so-distant future, the badge will be the only way you can turn on your workstation," he said.

Other security measures the bureau uses are removing floppy drives from all computer terminals, forbidding cell phones that are e-mail capa-

ble and personal digital assistants, and monitoring and carefully controlling every record of data that is accessed. Researchers caught browsing the data without authorization are subject to a \$250,000 fine and a five-year jail term.

Subject to search

"When you leave for the day, you must lock up all your data in your cubicle. Nothing can leave the building, and you are subject to search," Dr. Tolbert said. "When you are finally ready to publish any of your findings, the bureau performs a disclosure analysis on the paper to ensure that the results will not enable persons or establishments to be identified. The bureau is very serious about the anonymity of the respondents."

Dr. Tolbert said he believes he has more projects under way than any other academic with similar access. In fact, he finds himself in the middle of what may prove to be the most controversial aspect of Census 2000 — why it is showing a higher number of foreign-born respondents than the other recent census tools, such as the Current Population Surveys.

Dr. Charles M. Tolbert II knows more about Census 2000 results than most.

"Nobody is sure why this is happening," Dr. Tolbert said. "It could be that the population census question is not as intimidating in some way (as the Current Population Survey question) to foreign-born respondents, or it could be that the bureau's efforts at communication were much more successful than in the past. But we need to find out why." — Julie Carlson

Boundaries: Confluence in New Musics of the Pacific Rim," held at the University of California-San Diego.

Dr. J.R. LeMaster, professor of English, served as a poetry judge for a creative writing contest held at North Central Texas College in Gainesville.

Dr. Linda P. Livingstone, associate professor of management and associate dean for graduate business programs, participated in a panel titled "Required Notebook Computers in the MBA Classroom: Rationale, Logistics and Implications for Graduate Management Curriculum" April 23 at the Association to Advance Collegiate Schools of Business annual meeting in New York City. Dr. Livingstone and **Dr. Terry S. Maness**, dean of the Hankamer School of Business and professor of finance, participated in a panel titled "American Association of State Counseling Boards Effective Practice Project: The Required MBA Curriculum" April 24, also at that meeting.

Dr. Daniel B. McGee, professor of religion, presented "Prometheus and Adam Negotiate the Genetic Era" Feb. 20 at an American Association for the Advancement of Science meeting in San Francisco. He presented "Defining Life: Getting Our Minds Around a Paradox" March 5-6 at an American Association for the Advancement of Science workshop in Washington, D.C. He presented "Shaping a 21st Century Moral Strategy for the Medical Profession" April 27 at a Scott and White Hospital Surgical Alumni Society meeting in Temple.

Dr. Ann McGlashan, assistant professor of German, presented "An Expedition to the San Saba: An Early Texas Diary" April 6 at a joint convention of the Texas-German Society and German-Texan Heritage Society in Waco.

Dr. Charles S. Madden, vice president for University relations and The Ben H. Williams Professor of Marketing, presented the Chavanne Lecture in Christian Business Ethics, titled "A Brief History of the Future of Right and Wrong," April 24 at Houston Baptist University. He also served as track chair in strategic marketing May

30-June 2 at an Academy of Marketing Science conference in San Diego. Dr. Madden also is chairing the planning committee for the 2002 Marketing for Nonprofit Organizations Conference, sponsored by the AMA Foundation; serving on the program steering committee for the 2002 Marketing and Public Policy Conference for May in Washington, D.C.; and chairing the 2001-2002 AMA strategic planning committee.

Dr. James F. Moshinski, associate professor of information systems, chaired and presented a workshop on corporate e-learning at the "Running Training Like a Business" conference April 16-19 in Chicago.

Dr. John Nordling, assistant professor of classics, presented "Caesar vs. Liberty: A Composite Bibliography" March 2-3 at the 2001 Langford Latin Seminar at Florida State University in Tallahassee. Dr. Nordling also presented "The Pre-Battle Harangue of Pharsalus (BC 3,85-4): Did Caesar Tell a Joke?" April 19-20 at the Classical Association for the Midwest and South annual meeting in Provo, Utah. Other presenters at that meeting were **Dr. R. Alden Smith**, associate professor, chair of classics and director of the University Scholars Program, who presented "Good to Go: Echoing Expressions at Aeneid 4.55f"; **Dr. Jeffrey B. Fish**, assistant professor of classics, who presented "Philodemus and the Helen Pericope of Aeneid 2.567ff"; and **Dr. Eric A. Kylio**, lecturer in classics, who presented "Misreading Aeneas: Misdirection and Identification in Aeneid 7-12."

Dr. Viola I. Osborn, senior instructional designer, Academic Technology Center, participated in a videoconference titled "Identifying At-Risk Students in Videoconferencing Distance Education" May 16 at Nova Southeastern University in Fort Lauderdale, Fla.

Dr. Leslie E. Palich, associate professor of management, presented a co-authored paper titled "Competing in the 'Century of the Pacific': Modern China and the Dialectic Mindset" in December at an

international Scientific and Engineering Society meeting in Montego Bay, Jamaica. Co-authors are **Dr. Gary R. Carini**, associate professor of management, and **Dr. Linda P. Livingstone**, associate professor of management and associate dean for graduate business programs. Drs. Palich, Carini and Livingstone presented co-authored papers titled "Using Alternative Logics to Manage the Challenges of the New Competitive Landscape" and "Innovation and Technological Learning at Intel: The Role of Paradoxical Logic" in March at an Applied Business Research Conference international meeting in Cancun, Mexico.

Dr. David E. Pennington, professor of chemistry and Master Teacher, presided over executive council and general business meetings March 22-25 at a Southeastern Association of Advisers for the Health Professions meeting in San Antonio.

Dr. Kevin G. Pinney, associate professor of chemistry, presented "Stereoselective Synthesis of Conjugated Dienes from Alkynyl Oxirane Precursors: Potential Application toward the Construction of Tubulin Binding Ligands" March 5 to members of the Department of Chemistry and Biochemistry at Arizona State University in Tempe. He presented "The Development of New Vascular Targeting Agents for Cancer Chemotherapy" March 13 to officials of Oxigene Inc. in Boston.

Dr. M. David Rudd, professor of psychology and neuroscience and director of the PsyD program, presented "E-therapy and the Practice of Psychology" Feb. 24 at the Association of State and Provincial Psychology Boards annual meeting in Biloxi, Miss., and took part in a discussion group on E-therapy at the meeting. He presented "Assessing and Treating Suicidality in the Counseling Center Environment" April 19 at a Texas University Counseling Centers Directors Association meeting on South Padre Island. He chaired the Edwin Shneidman Award presentation

April 21 at an American Association of Suicidology meeting in Atlanta. He was an invited delegate at a suicide prevention consensus meeting June 13-14 in Bethesda, Md., sponsored by the National Institute of Mental Health.

Dr. Eric C. Rust, associate professor of history, organized and chaired the sessions "A University at War: Baylor 1941-1945" and "Prophet in an Age of Pessimism: Oswald Spengler on America, Americans on Oswald Spengler, 1918-1936" March 15-18 at the Southwestern Social Science Association annual meeting in Fort Worth.

Dr. R. Alden Smith, associate professor, chair of classics and director of the University Scholars Program, presented "'So Does the Moon Haunt Us': Dodo's 'Farewell' in Aen. 6" Feb. 8 at Princeton University; "Methought I Saw My Late Spoused Saint: Farewell to Creusa and Dido in the *Aeneid*" Feb. 9 at the College of Notre Dame of Maryland in Baltimore; "Breaking Up is Hard to Do: Some Thoughts on Leaving Your Lover in the *Aeneid*" March 15 at the University of Texas-Arlington; and "On Dumping Dido, Dumping on Dido: Suggestive Repetitions at Aen. 4.552-83" March 21 at Texas Tech University in Lubbock.

Dr. Beck A. Taylor, assistant professor of economics and The W.H. Smith Professor of Economics, presented "Incomes and Outcomes in Early Childhood" in April at a Society for Research in Child Development meeting in Minneapolis. He had a co-authored paper titled "Change in Family Income-to-Needs Matters More for Children with Less" presented at the meeting,

'Billy' bids adieu to Baylor with a bear hug

Judge Bill "Billy" Boyd, Baylor's 14-year-old, 500-pound North American black bear mascot, is making the adjustment to a new home after he was retired in May to a natural habitat ranch owned by California professional bear trainer Scott Handley.

"He's getting used to his new surroundings, which will be of great benefit to him," said Matt Green, who has served as Billy's trainer for the past 1 1/2 years. "I was sad to see him go because of the bond we had formed, but I'll visit him again at the end of summer to see how he's doing."

The longtime bear mascot made the trek to his new home north of Los Angeles with Green, fellow bear coordinator Ryan Fitzhugh and Baylor Chamber of Commerce bear trainer Tyler Sellers.

Although in good health, Billy's advancing age led to the decision to retire him.

"This is such a good opportunity for Billy to be able live out the remainder of his life in a 2 1/2 acre natural setting that he'll have to himself," said Sellers, who added that North American black bears can live up to 25 years in captivity. "Billy has been a wonderful bear and a symbol of Baylor and of the bear program. We and the entire Baylor community certainly will miss him."

Billy was named after Baylor yell leader Bill Boyd, who took care of "Joe College," a popular Baylor mascot acquired in 1932 when the Cotton Palace Zoo closed. Since that time, Baylor has had more than 50 live bear mascots.

Baylor's current 2-year-old mascot, "Chance," will continue to live in the Steve Hudson Memorial Bear Plaza near the Bill Daniel Student Center. He will be joined soon by "Joy," a cinnamon-colored North American black bear cub christened Judge Joy Reynolds after the wife of President Emeritus Herbert H. Reynolds.

"Joy" made her rambunctious public debut at the Reynolds' home in June. The 3-month-old, 25-pound bear, who was born on a private ranch in Oregon, also met with Baylor President Robert B. Sloan Jr.

Sellers, Joy's primary trainer, takes the bear on walks through campus, often meeting with students during orientation sessions. She'll make her first appearance at a Baylor football game on Sept. 8, when the Bears take on Arkansas State at Floyd Casey Stadium. — Lori Scott Fogleman

Presentations & Participations

continued from page 9

Presenters were co-authors Drs. Eric Dearing and Kathleen McCartney, Harvard University.

Dr. Elisabeth J. Teal, assistant professor of management, **Dr. Joe T. Felan III**, assistant professor of management, and **Dr. Nancy B. Upton**, professor of management and The Ben H. Williams Professor in Entrepreneurship, co-presented a paper titled "The Influence of Funding and Control of Growth: A Comparative Analysis of Fast-growth Family and Non-family Firms" Feb. 7-10 at a U.S. Association for Small Business and Entrepreneurship conference in Orlando, Fla.

Dr. John E. Thorburn Jr., assistant professor of classics, presented "The Chills of Aristophanic Comedy" March 3 at the Classical Association of the Canadian West annual meeting in Edmonton, Canada.

Dr. Tina L. Thurston, assistant professor of anthropology, presented "Uprooting and Resettlement in the Archaeological Record: The Cognitive Effects of Population Dislocation on the Politics of Domination and Resistance" in April at a Society for American Archaeology meeting in New Orleans.

Beth E. Tice, lecturer and fine arts catalog librarian, co-presented "The American Melting Pot Collection: Steps to Solving Problems of Access and Preservation of American History and Culture" in March at the Texas Music Library annual conference in San Marcos and in April at a Music Library Association national conference in New York City. Co-presenters were **Darryl Stuhrt**, Listening Viewing Center circulation supervisor, and **Sha Towers**, public services supervisor, Baylor Libraries.

Dr. Charles M. Tolbert II, chair and professor of sociology and anthropology, presented co-authored papers titled "What if the South has Plenty of Social Capital, But Not the Kind that Benefits It?: The Case of Baton Rouge" and "Sustainable Development in Oil and Gas Country: The Case of Abbeville, Louisiana" April 6-7 at the Southern Sociological Society annual meeting in Atlanta. Co-authors are F. Weil and D. Tootle, both from Louisiana State University.

Dr. Kenneth W. Van Treuren, associate professor of engineering, presented a co-authored paper titled "The Evolution of an Introductory Engineering Course Sequence: Responding to Student, Faculty and Industry Needs" March 28-30 at an American Society for Engineering Education Gulf Southwest section conference at Texas A&M University in College Station. Co-author is **Dr. Nicole C. DeJong**, assistant professor of engineering.

Dr. G. Peter van Walsum, assistant professor of environmental studies, and **Robert McWilliams**, Baylor graduate student, presented "Comparison of Aspen Wood Hydrolysates Produced by Pretreatment with Liquid Hot Water and Carbonic Acid" May 6-10 at the 23rd Symposium on Biotechnology for Fuels and Chemicals in Breckenridge, Colo.

Dr. Richard E. Watts, associate professor of educational psychology, presented "Constructive Interventions for Working with Couples" in November at a Texas Counseling Association annual conference in Houston. He presented "Constructive Interventions for Counseling Individuals, Couples and Families" in March at an American Counseling Association world conference in San Antonio.

Dr. James L. Williamson, chair and professor of educational administration and The Fred and Edith Hale Professor in Education, and **Dr. Betty Jo Monk**, associate professor of educational administration, presented a lecture on the Baylor School of Education's Scholars of Practice doctoral program March 22 at the Louisiana Professors of Educational Administration annual meeting in New Orleans.

John S. Wilson, associate professor, documents librarian and library development coordinator, presented "The Triumvirate: Learning to Work Together," "Finding the Givers: Building a Constituency" and "A Mark, A Yen, A Buck, A Pound: A Library Annual Report — What's Its Value?" April 1-4 at an Academic Library Advancement and Development conference at Georgetown University in Washington, D.C.

Dr. Ralph C. Wood, University Professor of Theology and Literature, presented a plenary address titled "C.S. Lewis' Supernaturalism: A Tolkienian Critique" and participated in a panel discussion on "The Oxford Christians" Feb. 24 at the Art & Soul International Symposium on Religious Faith and

Publications

Janet H. Bagby, senior lecturer in educational psychology, had a book titled *A Resource Guide for Planning and Operating After-School Programs* published by Southwest Educational Development Laboratory.

Betty Ruth Baker, assistant professor of curriculum and instruction, had a book titled *Teaching At-Risk Children: An Instructional Model in a Professional Development School* published by the Clearinghouse on Teaching and Teacher Education.

Dr. Clark Baker, assistant professor of journalism, had a review of *Hats in the Ring: An Illustrated History of American Presidential Elections* by Evan Cornog published in *CHOICE: Current Reviews of Academic Books* (Vol. 38, No. 7, March 2001).

Dr. Rodney G. Bowden, assistant professor of health, human performance and recreation, had an article titled "Comparison of Participants and Nonparticipants in a Worksite Cholesterol Screening Program" published in *International Electronic Journal of Health Education*.

Dr. Marianna A. Busch, chair and professor of chemistry and biochemistry, and **Dr. Kenneth W. Busch**, professor of chemistry, had a co-authored article titled "Design of a Modular Dispersive Spectrometer for Fundamental Studies in NIR Spectroscopy" published in *Spectroscopy* (Vol. 16, No. 4, pp. 24-33, 2001). Co-authors are **Olusola Soyemi** and **Dennis Rabbe**, Baylor graduate students, and **Ben Dundee**, Baylor undergraduate.

Dr. Curtis E. Clements, assistant professor of accounting and KPMG Peat Marwick Research Fellow, had a co-authored article titled "Reporting Financial Results with the Video Medium: An Experimental Analysis" published in *Journal of Information Systems* (Vol. 14, No. 2, pp. 79-94, fall 2000). Co-author is Dr. Christopher J. Wolfe, Texas A&M University.

Dr. Robert C. Cloud, professor of educational administration and health, human performance and recreation, had an article titled "Higher Education Accommodations for Disabled Students" published in *West's Education Law Reporter* (Nov. 23, 2000).

Dr. Robert G. Collmer, Distinguished Professor Emeritus of English, had a review of *Milton and the Death of Man: Humanism on Trial in Paradise Lost* by Harold Skulsky published in *Seventeenth Century News* (fall-winter 2000).

Literary Art on the Baylor campus. He presented "Walker Percy's Satiric Sendup of Our So-called Christian Culture" and "Flannery O'Connor as a Reshaper of Our Sentimental Sensibilities" in April at Northwestern State University in Natchitoches, La. He presented "Pertaining to the Earth: Wendell Berry's Stoic Naturalism" and participated in a roundtable discussion titled "Sally Fitzgerald's Contribution to Flannery O'Connor Scholarship" in May at a meeting of the American Literature Association in Cambridge, Mass. He was one of 12 invited scholars who participated in the Pew Consultation on Religion and American Literature May 18-19 in Rockport, Mass.

Dr. Frank B. Wyatt, assistant professor of health, human performance and recreation, co-presented "Examination of the Effects of Exercise on Patients with End-stage Renal Disease" Feb. 23-24 at a Texas American College of Sports Medicine conference at Texas Christian University in Fort Worth. Co-presenters were **Ronald Wilson**, part-time lecturer in health, human performance and recreation; Mindy Gentile, Oklahoma State University; and Baylor undergraduate **Bridget Davis**.

Robert F. Darden III, assistant professor of English, had a co-authored book titled *Little Mo's Legacy* published by Tapestry Press. Co-author is Cindy Brinker Simmons.

Dr. William V. Davis, professor of English and Writer-in-Residence, had a poem titled "Final Visit (For My Grandmother)" published in *Eureka Literary Magazine*. He had a poem titled "At the Geyser Basin" published in *The Portland Review Literary Journal*.

Dr. Mark Dubis, assistant professor of Christian scriptures at Truett Seminary, had an article titled "Sermon Preparation and the Internet" accepted for publication in an upcoming issue of *Journal of Religious and Theological Information*. He had an article titled "On Cyber-Illustrating Sermons" published in *Theophilus: A Practical Journal for Ministry* (Vol. 2, No. 1, 2001).

Dr. Guillermo García-Corales, associate professor of Spanish, had an article titled "La Escena del Desencanto en la Narrativa de Ana María del Río" published in *Revista de Artes, Letras y Filosofía* (No. 16, pp. 55-72, December 2000).

Dr. Gregory T. Garrett, associate professor of English, had an introduction and interview with the author published in Vicki Covington's book, *Night Ride Home*, which was reissued by Baylor Press. The book is included in the Literature and Religious Spirit Series, for which Dr. Garrett serves as general editor.

Dr. Nikolas K. Gosdev, associate director of The J.M. Dawson Institute of Church-State Studies and assistant professor, had the following articles published: "Espionage and the Ecclesia," *Journal of Church and State* (autumn 2000); "The New Party Card? Orthodoxy and the Search for Identity in Post-Soviet Russia," *Problems of Post-Communism* (November/December 2000); "Tolerance Versus Pluralism: The Eurasian Dilemma," *Analysis of Current Events* (December 2000); "When Mullahs and Metropolitans Meet: The Emerging Orthodox-Islamic Dialogue in Eurasia," *Orthodox News* (Vol. 3, No. 7, 2001); and "Iran's Eurasian Strategy," *Analysis of Current Events* (May 2001).

Kathy R. Hillman, associate professor and acquisitions and collection development librarian, had daily devotionals titled "Easter" (April 2001) and "Families" (May 2001) published in *World Evangelism*.

Dr. Susan K. Johnsen, associate professor of educational psychology and associate dean for scholarship and professional development, had a second edition of a co-authored book titled *Screening Assessment for Gifted Elementary Students* published by PRO-ED in Austin. Co-author is Dr. Anne Com, Vanderbilt University. Dr.

Johnsen had an article titled "What the Research Says About Affective Needs of Gifted Children" published in *Tempo* (Vol. 21, No. 1, pp. 24-31).

Dr. Roger E. Kirk, director of the Institute of Statistics, Distinguished Professor of Psychology and Statistics and Master Teacher, had an article titled "Promoting Good Statistical Practices: Some Suggestions" published in *Journal of Educational and Psychological Measurement* (Vol. 61, pp. 213-218, 2001).

Dr. Julia M. Kisacky, lecturer in Italian, had an article titled "For Love or Money: Adulteresses in Boiardo and Ariosto" published in *Romance Languages Annual XI* (pp. 210-215, 1999/2000).

Dr. P. Blaine McCormick, assistant professor of management, had a book titled *Ben Franklin's 12 Rules of Management* translated into Chinese and distributed in mainland China through Liaoning People's Publishing House and in Taiwan through The Fine Press Publishing Co.

Dr. Charles S. Madden, vice president for University relations and The Ben H. Williams Professor of Marketing, had an article titled "Integrating Key Institutional Functions in Marketing a University" published in *CASE Currents* (May 2001). He had a co-authored article titled "10 Ways to Make Products Work Harder" published in *The Counselor* (May 2001). Co-author is **Dr. Marjorie J. Cooper**, professor of marketing.

Dr. John D. Martin, professor of finance and The Carr P. Collins Chair of Finance, had a co-authored article titled "Transforming Enron: The Value of Active Management" published in *Journal of Applied Corporate Finance* (Vol. 15, No. 4, pp. 39-49, winter 2001). Co-author is Vincent Kaminski, Enron Corp.

Dr. William A. Mitchell, The Jo Murphy Chair in International Education and professor of political science, had book chapters titled "1939: Turkey Earthquakes" and "1992: Turkey Earthquakes" published in *Earthquakes, Natural Disasters*, edited by M. Bradford and R. Carmichael, Salem Press, 2001.

Dr. James F. Moshinski, associate professor of information systems, had a chapter titled "How to Keep E-learners from E-scaping" accepted for publication in the *2002 E-learning Sourcebook*, published by McGraw-Hill/ASTD.

Dr. Viola I. Osborn, senior instructional designer, Academic Technology Center, had an article titled "Identifying At-Risk Students in Videoconferencing and Web-based Distance Education" published in *The American Journal of Distance Education* (Vol. 15, No. 1, pp. 41-54, 2001).

Dr. Leslie E. Palich, associate professor of management, and **Dr. D. Ray Bagby**, associate professor of management and The Robert M. and Louise Rogers Chair of Entrepreneurship, had a co-authored chapter titled "Strategy in the New Millennium: Countertrade as an Emerging Opportunity for Entrepreneurial Firms" published in the book *Mathematics and Computers in Modern Science*, edited by Nikos Matorakis. Third co-author is Dr. R. Duane Ireland, University of Richmond.

Dr. Patricia W. Prewitt, professor of educational psychology, had a review of *Control: A History of Behavioral Psychology* by John A. Mills published in *History of Education Quarterly* (Vol. 40, No. 4).

Dr. M. David Rudd, professor of psychology and neuroscience and director of the PsyD program, had articles titled "The Ends Do Not Justify the Means" and "Psychology Stepping Up to the Plate" published in *Journal of Contemporary Psychotherapy* (Vol. 16, No. 15, 2001).

Dr. Terrill F. Saxon, assistant professor of educational psychology, had a co-authored book notice titled "Necessary But Not Sufficient: The Respective Roles of Single and Multiple Influences on Individual Development" published in *Child Development Abstracts and Bibliography*. Co-authors are Baylor doctoral students **Majka Mitchell** and **Loretta Rudd**.

Melvin Schuetz, night/weekend assistant, Moody Library, had a co-authored book titled *The Art of Chesley Bonestell* published in the United States by Sterling Publications and in England by Paper Tiger, 2001. Co-authors are Ron Miller and Fredrick C. Durant III of Bonestell Space Art.

Dr. Beck A. Taylor, assistant professor of economics and The W.H. Smith Professor of Economics, had a co-authored article titled "Change in Family Income-to-Needs Matters More for Children with Less" accepted for publication in an upcoming issue of *Child Development*. Co-authors are Drs. Eric Dearing and Kathleen McCartney, Harvard University.

Dr. Elisabeth J. Teal, assistant professor of management, had a co-authored article titled "Key Attributes of the Founding Entrepreneurial Team of Rapidly Growing New Ventures" published in *Journal of Private Equity* (Vol. 4, No. 2, spring 2001). Co-author is Dr. Charles W. Hofer, University of Georgia.

Dr. John E. Thorburn Jr., assistant professor of classics, had an article titled "Euripides' Ion: The Gold and the Darkness" published in *Classical Bulletin* (Vol. 76, pp. 39-49, 2000).

Dr. Tina L. Thurston, assistant professor of anthropology, had a book titled *Landscapes of Power, Landscapes of Conflict: State Formation in the South Scandinavian Iron Age* published by Kluwer Academic/Plenum Publishing (2001) as part of a series on fundamental issues in archaeology.

Dr. John R. Tisdale, assistant professor of journalism, had an article titled "Observational Reporting as Oral History: How Journalists Interpreted the Death and Destruction of Hurricane Audrey" published in *Oral History Review* (Vol. 27, No. 2, summer/fall 2000).

Michael L. Toon, assistant professor and librarian of The Texas Collection, had an article titled "Lawyers, Guns and Newspapers: Waco in the Spring of 1876" published in *Waco Heritage and History* (spring 2001).

Dr. (Maj.) Jessie L. Tucker, assistant professor of health care administration, had a co-authored article titled "Incorporating Patients' Assessments of Satisfaction and Quality: An Integrative Model of Patients' Evaluations of Their Care" accepted for publication in an upcoming issue of *Managing Service* (Vol. 11, No. 4, 2001). Co-author is Sheila R. Adams, U.S. Army Medical Department Center.

Dr. Carl G. Vaught, Distinguished Professor of Philosophy, had a revised edition of a book titled *The Sermon on the Mount: A Theological Investigation* published by Baylor Press.

Dr. Richard E. Watts, associate professor of educational psychology, had a book titled *Techniques in Marriage and Family Counseling* (Vol. 2) published by the American Counseling Association, 2001. He had the following articles published: "Biblically-based Christian Spirituality and Adlerian Psychotherapy," *Journal of Individual Psychology* (Vol. 53, No. 3); "Adlerian Encouragement and the Therapeutic Process of Solution-focused Brief Therapy," *Journal of Counseling and Development* (Vol. 78, No. 4); "Entering the New Millennium: Is Individual Psychology Still Relevant?," *Journal of Individual Psychology* (Vol. 56, No.1); "Adlerian Counseling: A Viable Approach for Contemporary Practice," *TCA Journal* (Vol. 28, No. 2); and "Addressing Spiritual

Issues in Secular Counseling and Psychotherapy," *Counseling and Values* (Vol. 45, pp. 207-217, 2001). He had a co-authored article titled "The Development of a Model to Cost Effectively and Efficiently Evaluate and Implement Violence Prevention Programs in Schools" published in *Connections: Journal of Principal Preparation and Development* (2001). Co-authors are Dr. D.R. Pietrzak, University of South Dakota, and Drs. B. Page and C.E. Hackney, Kent State University. The article also is available online at <http://www.principals.org/connections>.

Dr. Ralph C. Wood, University Professor of Theology and Literature, had an essay titled "The Providential and Scientific Seizures of Giant Despair" published in the International John Bunyan Society *Recorder* (spring 2001).

Dr. Frank B. Wyatt, assistant professor of health, human performance and recreation, had an article titled "Heart Rate Response of Asymptotic, At-Risk Individuals During Treadmill Work" published in *Kansas Association of Health, Physical Education, Recreation and Dance Journal*.

Honors & Appointments

Betty Ruth Baker, assistant professor of curriculum and instruction, received the Lorena Stretch Award presented by Delta Delta Delta for outstanding service to Baylor University.

Dr. Clark Baker, assistant professor of journalism, was awarded a Big XII Faculty Fellowship to undertake documentary research at the Humanities Research Center at the University of Texas-Austin.

Dr. Elden R. Barrett, professor of curriculum and instruction, received the State Unit Awards for Excellence in Member/Management and Articulation with the National Office and the Outstanding State Unit Award from Texas Teacher Educators.

Dr. Michael D. Beatty, director of the Institute for Faith and Learning and professor of philosophy, was selected as a member of the Notre Dame Center for Culture and Ethics Board of Advisers and the Lilly Fellows Program in Arts and Humanities national network board.

Dr. Ellie B. Caston, assistant professor of museum studies and director of operations of the Maybom Museum Complex, was named Educator of the Year by the Texas Association of Museums Educators Committee and was elected vice president of the association for 2001-2003.

Robert F. Darden III, assistant professor of English, won an Award of Excellence/Silver Award from the Council for Advancement and Support of Education in the category of "General Writing" for a *Baylor Line* story titled "Slab o' Sequoia."

Dr. Jimmy Dorrell, part-time lecturer at Truett Seminary, has completed his doctorate in renewal of the church for mission at Eastern Baptist Theological Seminary in Philadelphia.

Dr. Jeffrey B. Fish, assistant professor of classics, and **Dr. R. Alden Smith**, associate professor, chair of classics and director of the University Scholars Program, received Baylor's 2000-2001 H.S. and Virginia Wallace Award for Outstanding Teaching.

Dr. Randy Ford, director of student teaching and field experiences, has been elected president of the Texas Teacher Educators.

Dr. D. Thomas Hanks Jr., professor of English, was selected as 2000-2001 Outstanding Faculty Member by Baylor Student Congress.

Dr. John R. Knue, lecturer in information systems, received the 2001 Outstanding Individual Commitment to Service Award from the Texas Distance Learning Association.

Dr. Charles S. Madden, vice president for University relations and The Ben H. Williams Professor of

Marketing, was named to the 2001-2002 nominating committee of the American Marketing Association.

Dr. James F. Moshinski, associate professor of information systems, was named the 2001 Professor of the Year by the Baylor Interfraternity Council.

Janice O'Bryant, Baylor Libraries, was selected the libraries' "Staff Member of the Month" for April.

Dr. Andy Pittman, associate professor of health, human performance and recreation, received a service award from the Society for the Study of Legal Aspects of Sport and Physical Activity in recognition of eight years as editor of its newsletter.

Dr. James A. Roberts, associate professor of marketing and The Mrs. W.A. (Agnes) Mays Professor of Entrepreneurship, and Dr. Chris Manolis, Quinnipiac University, were selected as "Highly Commended Authors" by the Literati Club of the MLB University Press for their co-authored article titled "Baby Boomers and Busters: An Exploratory Investigation of Attitudes Toward Marketing, Advertising and Consumerism," published in *Journal of Consumer Marketing* (Vol. 17, No. 6, 2000).

Dr. Douglas W. Rogers, associate professor of curriculum and instruction and educational administration and director of the Center for Educational Technology, received the W.R. Fulton Award from the Texas Association for Educational Technology for outstanding leadership in the field of educational technology.

Dr. Howard L. Rolf, professor emeritus and chair of mathematics, received a Special Service Award from the Texas Association of Mathematics Chairs in honor of 30 years of service to the organization.

Dr. M. David Rudd, professor of psychology and neuroscience and director of the PsyD program, was appointed chair of the intervention and treatment section of the Suicide Prevention Research Center, funded by the Centers for Disease Control and Prevention.

Janet E. Sheets, associate professor and coordinator of instruction for English and education/reference librarian, was elected secretary of the Library Instruction Roundtable of the American Library Association.

Dr. Charles H. Talbert, Distinguished Professor of Religion, served in spring 2001 as the Catholic Biblical Association's Visiting Professor at the Pontifical Biblical Institute in Rome.

Grant Teaff, former head football coach and athletic director, was elected to the College Football Hall of Fame.

Dr. Charles M. Tolbert II, chair and professor of sociology and anthropology, was appointed a member of the technical advisory board of the regional entrepreneurship program at the Kauffman Center for Entrepreneurial Leadership.

John S. Wilson, associate professor, documents librarian and library development coordinator, was selected as local arrangements chair for the 2001 Academic Library Advancement and Development conference in Texas.

See "Honors" on page 12

Here is the Steeple...

Latest addition to new Truett Seminary rises above Baylor skyline

A new dimension was added to the Baylor skyline in late May as construction crews placed the steeple and a 9-foot gold leaf cross on the chapel of the new George W. Truett Theological Seminary complex.

Towering at 124 feet, the chapel spire is clearly visible from Interstate 35. The \$17 million, 64,000-square-foot facility is expected to be completed in spring 2002.

"The Truett Seminary complex is probably one of the most impressive buildings adjacent to the Interstate between Dallas and Austin," said Truett Dean Paul W. Powell. "It's a milestone, really, sending the steeple into the air. I feel a little like Winston Churchill when he said, 'This is not the end. It is not even the beginning of the end. But it is, perhaps, the end of the beginning.' This is the beginning of a new day and new era for Truett Seminary."

Truett anticipates a fall 2001 enrollment of

about 300 students. The new seminary complex will accommodate as many as 1,000 students, said René Maciel, Truett's assistant dean for administration and academic services.

"Everyone is excited about having a home of our own and faculty and staff having their own space," Maciel said. "As Truett has matured as a true community, we are all looking forward to being part of the Baylor campus."

Truett Seminary broke ground on the complex Feb. 2, 2000. The facility will feature:

- a 550-seat chapel, funded by a \$2.5 million grant from the Robert M. Rogers Foundation of Tyler and named in honor of Powell;
- a 100-foot-square landscaped, enclosed courtyard;
- a teaching chapel named in honor of Baylor President Robert B. Sloan Jr., Truett Seminary's founding dean; and

- a Great Hall, classrooms and meeting rooms, and faculty and administrative offices.

Longtime Baylor benefactors John and Eula Mae Baugh of Houston provided a \$5 million lead gift in November 1997 for the seminary's construction.

Truett Seminary held its first opening convocation on Aug. 28, 1994, with 51 students. Since then Truett has been recognized as one of the fastest growing seminaries in the country. Close to 150 have earned master of divinity degrees. The seminary also offers a doctor of ministry degree, a joint master of divinity/master of music degree in conjunction with Baylor's School of Music, and a joint master of divinity/master of social work degree in conjunction with the School of Social Work. — *Lori Scott Fogleman*

Honors

continued from page 11

Julie Wilson, Baylor Libraries, was selected the libraries' "Staff Member of the Month" for May.

Dr. Randy M. Wood, professor of curriculum and instruction and director of the Center for Christian Education, was selected as a member of the advisory panel of *Journal of Research on Christian Education*.

Baylor Line magazine, published by the Baylor Alumni Association and edited by **Dr. Todd Copeland**, won a silver medal in the "College and University General Interest Magazines" category of the 2001 international Council for Advancement and Support of Education Circle of Excellence Awards.

Professional Training

Several sections of Baylor Performance Management Process Training are available. To register, go to http://www.baylor.edu/Professional_Development_registration.html or call ext. 2699.

Baylor In the News

Dr. Jeffrey B. Fish, assistant professor of classics, was interviewed for a Discovery Channel program titled "The Hidden Scrolls of Herculaneum," which aired in 2001.

Dr. John L. Pisciotta, associate professor of economics, was interviewed May 31 on the Lynn Woolley talk show on KTEM-AM in Temple on recent results and future prospects for the 2001 congressional session.

Dr. Eric C. Rust, associate professor of history, was interviewed May 21 for "Wolf Pack: U-Boats of World War II," part of a four-hour History Channel series on the history of submarines to air in 2002.

Dr. S. Kay Toombs, associate professor of philosophy, was interviewed May 17-18 by the British Broadcasting Corp. for an episode on meaning and medicine in the upcoming BBC documentary series "Making Meaning."

Dr. Ralph C. Wood, University Professor of Theology and Literature, was interviewed about the work of J.R.R. Tolkien for the March-April 2001 edition of the *Mars Hill Audio Journal*.
