Proposed change to BSCS Program Educational Objectives: (4-8-2013)

The Computer Science Program at Baylor University strives to:

1. prepare students with a broad-based technical education in computer science.
2. stimulate students to think clearly, be creative, and communicate effectively.
3. instill a sense of professional ethics and civic responsibility.
4. prepare students for employment in organizations that will utilize their computing skills or to continue their education.
