Job Description : Providing information security services to CITGO's business unit managers so that they (the business unit managers) can carry out their responsibilities for protecting information. Such security services will most often take the form of operating information security software tools on behalf of other business unit managers and reporting the results of the operations to the business unit managers. Manages the production and activities of information security professionals in the provision of security services. Plans and directs work, provides training, and facilitates interaction with information security services customers. Acts as a leader, motivator, and mentor to others and inspires them to achieve their goals. Reviews candidates to fill vacancies, conducts performance reviews and recommends salary increases and bonus payments. In addition to a firm knowledge of information security principles, CITGO's Information Security Services Manager must have:

- × Current knowledge of information security issues which affect CITGO's business processes
- × Knowledge of CITGO's information security policy, standards and procedures
- × Expertise in the operation of information security tools deployed at CITGO.
