REPORT DECEMBER 2006

STUDENT WORKERS

Brittney Bain graduated in December and accepted a position with the Fort Bend Economic Development Council. She did outstanding work for us while she was here. She will be missed but not replaced.

Edwin Cook accepted the challenge of bringing order out of chaos to three boxes of Jack White JFK correspondence which was literally thrown into the boxes in no order: envelopes, letters, articles, photographs.

Grace Chiuri continued her work on the Bob Platt papers. She is carefully consolidating all the documents from three years of Platt papers into one cohesive whole. Location codes are being evaluated and changed as needed.

Janna Dotschkal worked on foldering JFK magazines from Jack White and putting them in date order. The plan is to return them to him in better condition than when they arrived. Maybe then he'll give them to us someday.

Justyn Kurkendall continued downloading Jack White video tapes about JFK to the Mac G5, then editing them and burning them to DVDs. This was slowed by installation of Mac X Tiger and a new version of iLife.

Kristine Harveaux-Lundeen continued processing Penn Jones papers donated in August and incorporating them with similar materials donated in 2004, 2005 and March 2006. This is a puzzle that needs to be put together and Kristine is the one to do it.

Mac Macwan expended considerable time coordinating three lists of JFK magazines into one coherent whole so we would not make the mistake of photocopying duplicate articles. This will save us considerable time in the future.

Michael Koski completed typing the contents on Jack Hightower personal vertical file and returned to typing the contents of the Hightower vertical file created by the staff. These two vertical files will be cataloged separately to reflect the Judge's wide range of interests.

Michael Holdridge provided assistance to Justyn on the JFK videos from Jack White, worked to update web pages, updated Mac OS on two computers, and generally tried to keep the tech department running smoothly.

Michael Anderson kept all the books shelved as they arrived from cataloging, helped Grace with the Platt vertical file, and provided light holiday conversation to one and all.

Book Vault / Christmas Tree photos are online:
