TP Cloud Account and Canvas Integration

Instructions

You will first need to connect your Turning Account to Canvas:

1. Login to Baylor's Canvas LMS (baylor.instructure.com).

2. Select “Commons” from the left side panel.

3. Uncheck the “Show Public Resources” slider, located under the Search box in the middle of the page.
4. Type “Turning” in the Search box to bring up “Turning Technologies Clicker/Account Registration” module link.
5. Click on the “Turning Technologies Clicker/Account Registration” module link.

6. In the “Import into Canvas” box, select the courses you wish to integrate with TPCloud, and click the green “Import into Course” button.

7. The modules you import into your course(s) will automatically be published in Canvas.
8. On the left side of your dashboard page, you should see the “Courses” icon. Click the icon, and then select any course that you previously imported your module to.

9. Then click on “Modules”.

10. Click on “Turning Technologies Clicker/Account Registration”
11. After this, you will be asked to create an account. Enter the appropriate information and click “finish”.

11. On the next screen, click “finish” one more time (even if you don’t have a license code or response device ID).

12. Your dashboard page should now show a green checkmark under the “Learning Management System” icon. Once you see this checkmark, your Turning Point account and Canvas account are properly connected.
13. Download the Turning Point Cloud software on your office or laptop computer by clicking the “Downloads” link on the left side panel.

14. Choose the appropriate version of TP Cloud for your computer platform, “PC – Install” or “Mac – No Install”.

15. Follow prompts to complete the installation. Note: The TP Cloud software should already be available on all classroom instructor computers.

**Note:** All students are required to have a Turning Account and License to receive polling grades. More information will be coming soon.
Training is available throughout the summer through Turning Technologies on the software, Learning Management System integration and much more. If you are unavailable to sign up for any of the Baylor specific trainings, you may sign up for other classes at:

https://www.turningtechnologies.com/support/turningpoint-cloud/online-classes/educators

Tutorial videos are also available for review at:
https://www.turningtechnologies.com/support/turningpoint-cloud/tutorials

A helpful checklist is listed below to help keep you on track with your clicker experience prior to Fall 2016:
1. Create a Turning Account as outlined above
2. Download the software to your office computer from your Turning Account as outlined above.
3. Determine the best software solution for your lecture (i.e. PowerPoint Polling or Anywhere Polling) by reviewing some of the software tutorials at: https://www.turningtechnologies.com/support/turningpoint-cloud/tutorials
4. Sign up for online training via the attached brochure or at https://www.turningtechnologies.com/support/turningpoint-cloud/online-classes/educators
5. Request an Instructor Kit, if you don’t already have one, from cts@baylor.edu
6. Submit your clicker order to the Baylor Bookstore to ensure they will have enough stock for your students. You may also provide your students with the option to purchase their clickers/license via their Turning Account login.
7. Update your syllabus
8. Update your lectures, where necessary
9. Practice-Practice-Practice
10. Questions??? Please contact Baylor Classroom Technology Services at 254-307-1614 or cts@baylor.edu
Support
Should you have any technical questions, our team is available as well.
