The Family Translational Research Group (FTRG) at New York University (NYU) is looking for talented, hard-working people with a passion for understanding and preventing family maltreatment and improving the lives of military families to join our team.

1. Ft. Drum (NY)  
2. Ft. Bragg (NC)  
3. Ft. Campbell (KY)  
4. Ft. Stewart (GA)  
5. Ft. Bliss (TX)  
6. Ft. Hood (TX)  
7. Ft. Riley (KS)  
8. Ft. Carson (CO)  
9. JBLM (WA)  
10. Schofield Barracks (HI)

FTRG conducts research on topics ranging from defining maltreatment in ways that can be reliably used by field workers, to determining how the way couples handle conflict relate to violence, to examining the effects of family violence on children's psychological and physical functioning, to furthering our understanding of risk and protective factors for child maltreatment and partner abuse. In addition to this basic research, FTRG is involved in large community-based prevention efforts (with both military and university communities) and in multi-level family prevention efforts. These studies use the full spectrum of research methods — from intensive observational tools to epidemiological surveys to intervention science. The FTRG typically has about 8-10 active federally-funded projects. The group includes several doctoral level psychologists, masters level researchers and counselors, and bachelor level research staff. The FTRG is co-directed by Dr. Amy M. Smith Slep and Dr. Richard E. Heyman. For more information about our group, go to [www.ftrgroup.org](http://www.ftrgroup.org)

Researchers at the FTRG have (a) developed and refined definitions of partner and child maltreatment; (b) tested the agreement between master reviewers and installation committees; (c) assisted in the implementation of a new family maltreatment decision-making body; and (d) tested the dissemination of the decision process at 40 military installations worldwide.

For this next part of our research, we need full-time, military-site coordinators to: (1) complete initial training and intensive phone and video-based supervision, (2) collect data, (3) attend clinically-relevant meetings regarding maltreatment and intervention, and (4) meet with members of research team when they visit the installation.

- **Junior Research Scientist:** Candidates must possess a master’s degree in psychology, social work, counseling or related field. License-eligible or licensed preferred. It is strongly preferred that applicants have experience with (1) family maltreatment — clinical or research, (2) supervision, (3) research — especially with relevance to family maltreatment, and/or prevention, and (4) military culture/military families. Fluency in computer applications (e.g., Microsoft Office), as well as video-based applications (e.g., Google Hangout, FaceTime) is required for training and supervision purposes.

NYU offers excellent benefits. Salary and title will be commensurate with qualifications and experience.
NYU is an Equal Opportunity/Affirmative Action Employer

To apply: (1) Please send your email and local installation to David Maisson at d.maisson@nyu.edu. (2) You will be sent a Dropbox link to upload the following information, addressed to Dr. Ann C. Eckardt Erlanger: (a) letter of application and (b) curriculum vitae with contact information for three references on the final page.
