New Grants/Sponsored Programs Financial System Coming Soon

The University is currently implementing software modules within the TRAX (PeopleSoft Financials) system for use in management of Baylor's sponsored programs. This implementation is aimed at improving business practices in research administration and accounting; reducing potential compliance risks; and providing a robust technical foundation to meet current and future sponsored program needs.

The new Grants system will provide enhanced integration with the current TRAX modules and will impact numerous business processes across the University. As implementation is completed this Spring, watch for updates about how the new grants/sponsored programs system will affect you and for training opportunities to help users operate successfully.

Report Processing Issues

We are currently aware of and researching system performance issues, particularly with certain reports such as the Department Detail and Trial Balance statements. We are in the process of examining how recent changes may have impacted the system. Please note that some reports can, at times, take an hour to finish processing. Please do not continually run multiple reports for the same information if you do not receive results quickly, as this could potentially cause further delay. Contact the TRAX hotline (x8704, option 8) or email TRAX@baylor.edu if you need assistance or have questions about your reports.
