ECS Matlab Agreement Form

Matlab is available for Faculty/Staff home computers based on the existing license agreement between MathWorks and Baylor University. MathWorks also allows the software to be installed on systems owned by graduate students working for Baylor University for Research or Teaching support. To qualify for this license you must meet the following qualification criteria:

- Be employed by Baylor University receiving a stipend for Teaching or Research support.
- Be enrolled in classes for the current term.
- Agree to the installation requirements below.

The software will need to be renewed each summer (around June 15th). The renewal can be done remotely if needed, but students must meet the above qualification criteria, including being enrolled in classes for the following Fall Term, and must have a signed copy of this agreement on file with ECS IT Support staff.

If you meet the above qualification criteria, you may work with ECS IT Support staff to have a copy of Matlab installed on a single computer provided that you agree to the following installation requirements:

1. I must agree to the MathWorks Matlab license agreement in order to use the software.
2. My computer meets the minimum installation requirements as listed on MatWorks' web site (http://www.mathworks.com/support/sysreq/current_release/)
3. I will make an appointment with a member of the ECS IT Support Staff at least 2 days in advance or attend a prearranged installation workshop.
4. I must bring my laptop/desktop to campus for the install.
5. My computer must be able to connect to the wireless network for the install.
6. I must be present for the installation to provide access credentials as needed. The computer may also need to be rebooted to complete the install.   I will NOT leave my computer with ECS IT Support staff for the install.
7. An ECS IT Support Staff member will install the software on a single computer owned by me for coursework completion or teaching support.
8. I will not be provided with a copy of the installation media. I understand that I must show proof of removal of the software on my old computer before the installation can proceed on a new computer.
9. I will not provide copies of this software in any form to any other individual. I will also not attempt to duplicate the install on another computer or media.
10. ECS IT Support Staff will verify that Matlab is working by launching the program.   Once the program launches and licensing and toolbox information is verified, I understand that NO further support will be provided.
11. I understand that ECS IT Support Staff are unable to offer assistance for any other software or hardware related issues on the computer.
12. I agree that ECS IT Support Staff will have no responsibility or liability for problems caused by the installation of this software. This software may not install or run on all systems. ECS IT Support Staff will make every effort to resolve these issues, but the software may not work on every system.
13. Once I leave Baylor University, I agree to remove the software from my computer.

I agree to the above conditions.
