Scope and Content

The chronology of this collection extends from 1913 to 1979, although the vast majority of materials fall within the years Bob Poage served in the U.S. House of Representatives (1937-1978). These materials represent secondary research and reports accumulated by Poage. Both series pertain to the development of Texas's infrastructure and natural resources.

Series I. General covers a wide range of topics not specifically related to Texas's water resources. Some of the most well-represented subjects include agriculture, education, energy, healthcare, and transportation. The folders in this series are arranged alphabetically by topic.

Series II. Water Resources, the largest series in the collection, relates solely to Texas's waterways including its rivers, tidelands, and basins. Issues such as water conversation, the construction of dams, desalinization, wastewater, and ownership of submerged lands are covered thoroughly in this series. These folders are arranged alphabetically by the individual or organization who created the materials.

Biographical History

William Robert "Bob" Poage, the son of William Allen Poage and Helen Wheeler Conger, was born on December 28, 1899 in Waco, Texas. The Poage family moved to Throckmorton County shortly thereafter where William A. Poage worked as a rancher and cattleman. The Poages eventually returned to Waco in 1913. Five years later, in 1918, Poage graduated from Waco High School and joined the U.S. Navy as an apprentice seaman during the waning months of World War I.

After the war, Poage briefly attended classes at the University of Texas and the University of Colorado at Boulder before enrolling at Baylor University. In 1921, he graduated with a bachelor's degree in geology. Poage taught geology from 1922 to 1924, while simultaneously working on his law degree. In 1924, he earned his law degree from Baylor University and gained admittance to the Texas Bar.

In that same year, Poage ran for political office, winning a seat in the Texas House of Representatives. He served in the Texas House from 1925 to 1929, all while practicing law in Waco and teaching at Baylor Law School. In 1928, Poage attempted but lost a bid for a seat in the Texas Senate and briefly returned to civilian life. In 1931, Poage sought to fill a Senate seat vacated by Edgar Witt. He won the special election this time, ultimately serving in the Texas Senate from 1931 to 1937.

Striving to increase his political influence, Poage tried to unseat U.S. Representative O. H. Cross of the 11th Congressional District of Texas. Poage lost in 1934 but succeeded in defeating Cross in 1936. It was to be the start of a long-tenured career for the Texas Democrat. On February 14, 1938, amidst his political successes, Poage married Frances Lenoir Cotton.

Poage served in the U.S. House from 1937 until his retirement in 1978, often running unopposed in the biennial elections. Drawing from his childhood experiences and education, Poage championed life in rural America, seeking improvements such as water and telephone services and helping to establish the Rural Electrification Administration. Often referred to as "Mr. Agriculture", Poage was a key member of the House Agriculture Committee from 1941 to 1978, chairing the committee from 1967 to 1974. Upon his retirement from the House in 1978, Poage was succeeded by Democrat Marvin Leath.

The W. R. Poage Legislative Library was opened in September 1979 in honor of Representative Poage and serves as the repository for his personal and congressional papers. Poage wrote five books during his lifetime including three in retirement: *After the Pioneers* (1969), *Politics-Texas Style* (1974), *How We Lived* (1980), *McLennan County Before 1980* (1981), and his autobiography, *My First 85 Years* (1985).

Poage passed away during open-heart surgery in Temple, Texas, on January 3, 1987, and is buried in Waco's Oakwood Cemetery.

Archival Arrangement

The W. R. "Bob" Poage papers have been processed previously, most notably in 1995. Detailed finding aids and folder listings existed prior to this latest round of processing.

Due to the large size of the collection, the W. R. "Bob" Poage papers are being divided into six new collections based on the existing series outline. The materials in the Texas Development papers were originally housed in Boxes #1090-1129. Some loose materials have also been integrated with these files. The collection is now arranged into two series: I. General and II. Water Resources.

Series 1: General. 1927-1979, undated

Administrative

Series I. General primarily consists of booklets, reports, and other literary productions pertaining to the development of Texas's infrastructure. These documents, in contrast to those found in Series II, do not relate to the state's water resources. Most of the materials are secondary in nature. Representative Poage did not contribute to them directly, rather, he would have used them for research.

The folders in this series are arranged alphabetically according to subject matter then chronologically within each topic. Agriculture, education, energy, healthcare, and transportation are a few of the more prominent issues addressed. Overall, the series is in good condition.

Series 2: Water Resources. 1913-1978, undated

Administrative

Series II. Water Resources, the largest series in the collection, contains reports, surveys, legal documents, and other literary productions pertaining to the development of Texas's water resources, both fresh and salt-water. Most of the materials are secondary in nature. Representative Poage did not contribute to them directly, rather, he would have used them for

research purposes.

The folders within this series are arranged alphabetically according to the creator of the materials, then chronologically under each creator. Publications from the U.S. Army Corps of Engineers, the Texas Water Development Board, the U.S. Department of Agriculture, and the Soil Conservation Service are prominently featured. The series also includes several legal documents produced during a U.S. Supreme Court case, *U.S.A. v. State of Texas*, which debated ownership of the Texas tidelands and the oil resources therein. Overall, the series is in good condition.
