

Barbeque Operation Guideline

PURPOSE:

To ensure safe operations of a barbeque, the following necessary precautions shall be followed:

1. Never attempt to relocate a grill once it has been lit or a grill that is hot.
2. Portable grills should be used on firm, flat, stable surface.
3. NEVER grill inside, under a tent or awning, or on a combustible balcony. Grilling on noncombustible surfaces such as concrete or asphalt is preferred.
4. No accelerants will be used to ignite charcoal/wood grills. Use only self-starting charcoal.
5. All coals will be disposed of in a safe manner. It is recommended that a metal can be used for this process.
6. No grills will be used within ten feet of any building or combustible material.
7. An approved fire extinguisher will be readily available when grilling is in progress.
8. All grills will be cleaned and inspected prior to use.
9. Never leave the grill unattended.
10. Turn off the gas to the grill when you are finished.
11. All portable grills will be stored properly, (no propane bottles may be stored inside any Baylor building)
12. Propane grills at Teal & Earle will only be used under supervision by CLL professional staff.
