

Usage and Survey Log for Room _____

Guideline For Using This Log:

1. An entry should be made for each radioisotope used in the room.
 - a. A date range is acceptable for a multiple day research process.
2. Complete a room survey to verify no radioactive contamination exists:
 - a. Should be completed at the completion of each experiment or process where radioisotopes are used.
 - b. Should be completed whenever a spill and cleanup occurs (also notify the Department of EH&S at 710-2900).
 - c. Must be completed at least monthly during extended radioisotope use.
3. Contact the Department of Environmental, Health & Safety at 710-2900 with any questions or for instruction on completing room surveys.
