

Forgetting the Network on iOS Device

When AirBear will not work on an iOS device, it may be necessary to **Forget the Network** and re-join. To forget the network:

Launch the **Settings** app, tap **Wi-Fi**, and then tap the info button next to the **AIRBEAR WPA2** network . It looks like a lower-case "i".

Tap **Forget This Network**, and then tap **Forget** when prompted to confirm you want to forget the network.

To reconnect to AirBear, select **AIRBEAR WPA2** from the list of available networks and enter your username and password.
