i2002 Internet Telephone

This document describes i2002 features and how to use the i2002 Internet Telephone. The i2002 Internet Telephone brings voice and data to the desktop by connecting directly to a LAN through an Ethernet connection.

**Note 1:** Not all features are available on all telephones. Consult your network administrator to verify which features are available for your use.

**Note 2:** In this guide, Programmable Line (DN)/Feature Keys (self-labeled) keys display beside the label. Soft Feature keys display directly below the label.

**Features**

The i2002 Internet Telephone supports the following features:

- Four Programmable Line (DN)/Feature Keys (self-labeled)
- Four Soft Keys (self-labeled) providing access to ten features
- Large multi-field LCD display
- Wideband-compatible speakerphone
- Headset jack with On/Off key
- Volume control bar for adjusting ringer, speaker, handset, and headset
- Six specialized fixed keys:
  - Quit
  - Directory
  - Inbox (Message)
  - Shift (reserved for future feature development)
  - Services
  - Expand to PC (reserved for future development)
- Call processing fixed keys:
  - Hold
  - Goodbye
  - Handsfree
  - Mute
- Automatic IP address
- Hearing-aid compatibility
Use the **Volume Control** to adjust the volume of the Handset, Headset, Speaker, Ringer, and Handsfree features. Press the right side of the rocker bar to increase volume, the left side to decrease volume.

Use the **Goodbye** key to terminate an active call.

Press the **Headset** key to answer a call using the headset or to switch a call from the handset or Handsfree to the headset.

A steady LCD light beside a **Line** (DN) key indicates the feature or line is active. A flashing LCD indicates the line is on hold or the feature is being programmed.
Press the **Hold** key to put an active call on hold. Press the **Line (DN)** key beside the flashing to return to the caller on hold.

Press the **Speaker** key to activate handsfree. The speaker LED lights to indicate when handsfree is active.

The **Expand to PC** key is a fixed key that is reserved for future development.

Press the **Inbox (Message)** key to access your voice mailbox.

*Note:* On the 3900 telephone series, the **Messages** key corresponds to the **Inbox (Message)** key.

The **Shift** key is a fixed key that is reserved for future feature development.

Press the **Directory** key to access directory services.

Press the **Mute** key to listen to the receiving party without transmitting. Press the **Mute** key again to return to a two-way conversation. The **Mute** key applies to Handsfree, Handset, and Headset microphones. The Mute LED flashes when the **Mute** option is in use.

Use the **Navigation** keys to scroll through menus and lists in the display area.

Press the **Quit** key to end an active application. Pressing the **Quit** key does not affect the status of the calls currently on your telephone.
Your i2002 Internet Telephone’s controls

Press the Services key to access the following items:

- Telephone Option:
  - Volume Adjustment
  - Contrast Adjustment
  - Language
  - Date/Time Format
  - Display diagnostics
  - Local Dialpad Tone
  - Ring type
  - OnHook Default Path
  - Change Feature key Label
  - Set Information

- Virtual Office Login and Virtual Office Logout (if Virtual Office is configured)

- Test Local Mode and Resume Local Mode (if Branch Office is configured)

The Primary Directory Number (DN) keys are the Line/Feature keys located at the sides of the upper display area. When you pick up the handset, the line associated with this key can support a call.

*Note:* Although you can have additional DN keys assigned to your telephone, there is only one Primary DN.

Press the More.. key to access the next layer of Soft Feature (self-labeled) keys.

Programmable Line (DN)/Feature Keys (self-labeled) are configured for various features on the telephones.

Soft Keys (self-labeled) are located below the display area. The LCD label above the key changes, based on the active feature.

*Note:* A triangle appears before a key label indicates that the key is active.
i2002 Internet Telephone display

This section summarizes the display features of the i2002 Internet Telephone. The Idle display is shown in the figure below.

The i2002 telephone has two display areas:

- The upper display area provides line and feature key status and contains single line information for items such as party and set information.
- The lower display area provides feature key labels.
Install your i2002 Internet Telephone

Connect the i2002 telephone components

CAUTION
Damage to Equipment
Do not plug the i2002 Internet telephone into an ISDN connection. This results in severe damage to the i2002 telephone. Consult your system administrator to ensure that you plug your set into a 10/100BaseT Ethernet jack.

1. Connect one end of the handset cord to the handset jack (identified with a handset icon) on the back of the telephone and the other end to the jack on the handset.

2. Choose one of the following connections:
   a. *For a telephone not sharing a LAN access with a PC*, connect one end of the CAT-5 line cable to the LAN ethernet port located on the back of the telephone (identified with a LAN icon). The other end of the CAT-5 line cable plugs into the IP network.
   b. *For a telephone sharing a LAN access with a PC*, connect one end of the CAT-5 line cable to the LAN ethernet port located on the back of the telephone (identified with a LAN icon) and the other end to the IP network. Insert a second CAT-5 line cable into the PC ethernet port located on the back of the telephone (identified with a PC icon) and the other end into the computer's Ethernet port.

3. Contact your installation technician for the proper power option. This telephone can be powered by an AC adapter or over a LAN.

4. Thread the cord around the strain relief, retaining hook, and channel provided for a secure power connection.

5. Secure the telephone footstand to the telephone base. Use the angle grip on the top back of the telephone to change position.

PC Ethernet
Your i2002 Telephone Option menu

The i2002 Internet Telephone Services menu lists the following menus:

- The Telephone Option menu enables you or your Network Administrator to configure telephone preferences.
- The Virtual Office Login and Test Local Mode (for Branch Office) menus are listed when an i2002 Internet Telephone class of service is set for Virtual Office and Branch Office.

The Telephone Option menu offers the following options:

<table>
<thead>
<tr>
<th>Volume adjustment...</th>
<th>Display diagnostics</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contrast adjustment</td>
<td>Local Dialpad Tone</td>
</tr>
<tr>
<td>Language...</td>
<td>Ring type...</td>
</tr>
<tr>
<td>Date/Time format...</td>
<td>Change Feature key label</td>
</tr>
<tr>
<td>OnHook Default path</td>
<td>Set Information</td>
</tr>
</tbody>
</table>

Note: The ellipses (...) appears after an option item to indicate a sublist.

To use the Telephone Option menu:

1. Press the Services key.
2. Using the Navigation keys to move up and down through the Services Menu, highlight Telephone Option.
3. Press the Select key.
4. Use the Navigation keys to scroll through the list of customizable options.
5. Highlight a feature to adjust (for example, Language).
Your i2002 Telephone Option menu

6. Press the Select key. The display provides information required to adjust your selection.

7. Choose one of the following:
   a. Press the Select key to save changes and return to the Telephone Option menu.
   b. Press the Quit key to keep existing settings.

Adjust volume

After selecting Volume adjustment... from the Telephone Option menu, choose Ringer, Handset, or Handsfree for volume adjustment.

To adjust Ringer volume:

1. Select Ringer from the Volume menu.

2. Press Lower to decrease volume, Higher to increase volume.

3. Choose one of the following:
   a. Press the Select key to save the volume level and return to the Telephone Option menu.
   b. Press the Quit key to keep existing settings.
Your i2002 Telephone Option menu

To adjust Handset listen volume:

1. Select **Handset listen** from the **Volume** menu.
2. Press **Lower** to decrease volume, **Higher** to increase volume.
3. Choose one of the following:
   a. Press the **Select** key to save the volume level and return to the **Telephone Option** menu.
   b. Press the **Quit** key to keep existing settings.

To adjust the Handsfree listen volume:

1. Select **Handsfree listen** from the **Volume** menu.
2. Press **Lower** to decrease volume, **Higher** to increase volume.
3. Choose one of the following:
   a. Press the **Select** key to save the volume level and return to the **Telephone Option** menu.
   b. Press the **Quit** key to keep existing settings.

To adjust the Headset listen volume:

1. Select **Headset listen** from the **Volume** menu.
2. Press **Lower** to decrease volume, **Higher** to increase volume.
3. Choose one of the following:
   a. Press the **Select** key to save the volume level and return to the **Telephone Option** menu.
To adjust the Buzzer volume:

1. Select **Buzzer** from the **Volume** menu.

2. Press **Lower** to decrease volume, **Higher** to increase volume.

3. Choose one of the following:
   a. Press the **Select** key to save the volume level and return to the **Telephone Option** menu.
   b. Press the **Quit** key to keep existing settings.

Adjust Screen contrast

The Screen contrast option adjusts the telephone’s display contrast. After selecting **Contrast Adjustment** from the **Telephone Option** menu:

1. From the **Contrast** screen, press **Lower** to decrease display contrast level, **Higher** to increase display contrast level.

2. Choose one of the following:
   a. Press the **Select** key to save the contrast level and return to the **Telephone Option** menu.
   b. Press the **Quit** key to keep existing settings.
Your i2002 Telephone Option menu

Select a language

The display is available in multiple languages. After selecting Language... from the Telephone Option menu:

1. Using the Navigation keys, highlight the desired language (for example, German [Deutsche]).

2. Choose one of the following:
   a. Press the Select key to save the language and return to the Telephone Option menu.
   b. Press the Quit key to keep existing settings.

Select Date/Time format

There are several Date/Time formats. Formats are based on the 12-hour and the 24-hour clock. After selecting Date/Time format... from the Telephone Option menu:

1. Using the Navigation keys, highlight the desired format. Sample formats appear on the upper right side of the display area.

2. Choose one of the following:
   a. Press the Select key to save the format and return to the Telephone Option menu.
   b. Press the Quit key to keep existing settings.
Display diagnostics

The Display diagnostics option tests the telephone’s display screen and indicator lights. After selecting Display Diagnostics from the Telephone Option menu:

1. Using the Navigation keys, scroll through the list to view display capabilities.
2. Press the Quit key to return to the Telephone Option menu.

Local Dialpad Tone

The Local Dialpad Tone option enables a pressed telephone dial key to produce Dual Tone Multi-Frequency (DTMF) sounds, a single tone, or no sound. After selecting Local Dialpad Tone from the Telephone Option menu:

1. Using the Navigation keys, highlight one of the following dial pad ring tones:
   a. None to disable all tones.
   b. Short Click to enable a single tone for all keys.
   c. DTMF to turn on a separate DTMF tone for each key.
2. Choose one of the following:
   a. Press the Select key to save the tone selection and return to the Telephone Option menu.
   b. Press the Quit key to keep existing settings.
Choose Ring type

The Ring type option sets the telephone’s ring tone. After selecting Ring Type... from the Telephone Option menu:

1. Using the Navigation keys, highlight one of the ring types.

2. Press the Play key to sample the ring tone.

3. Choose one of the following:
   a. Press the Select key to save the ring type and return to the Telephone Option menu.
   b. Press the Quit key to keep existing settings.

Enable OnHook Default Path

When the set is on-hook, the OnHook Default Path option enables a Headset or a Handsfree connection. After selecting the OnHook Default Path from the Telephone Option menu:

1. From the OnHook Default Path screen, choose one of the following:
   a. Press the handsfree enable option.
   b. Press the headset enable option.

2. Choose one of the following:
   a. Press the Select key to save the default path and return to the Telephone Option menu.
   b. Press the Quit key to keep existing settings.
Your i2002 Telephone Option menu

Change Feature Key Label

The Change Feature Key Label option renames the label displayed next to each feature key or restores the default labels to the keys. After selecting Change Feature Key Label from the Telephone Option menu, choose one of the following:

To Change the labels:

1. From the Change Feature Key Label screen, press Select key.
2. Press the Feature key that is being changed.
3. Enter the new information for the feature key label. To enter special characters, press the up navigation key. 

   Note: If you enter a prime DN key, an error message displays.

4. Press the Select key to save the changes and return to the Telephone Option menu.

To restore the default labels:

Choose one of the following:

1. To restore all default labels:
   a. From the Change Feature Key Label screen, press the Restore all key labels key.

   b. Press Yes to change all feature keys to default values.

   Note: When Yes is selected and values are changed to the default values, you can not undo the change. Feature key labels are erased in the memory. The label settings must be re-entered.

2. To restore one selected label:
   a. Press Restore one key label.

   b. Press Select.

   c. Press a feature label key.
d. Select Yes to change the selected feature label key to the default value.

Set Information

The Set Information option displays the following set-specific information:

- IP address
- Hardware ID of the Internet Telephone
- Current firmware version
- TN programmed on set
- Node ID and IP address
- The Voice Gateway Media Card on which the Internet Telephone is registered

After selecting Set Information from the Telephone Option menu:

1. Using the Navigation keys, scroll through the list to view the Set information.
2. Press the Quit key to return to Telephone Option.
Call features

System administration is required for Call features. Contact your system administrator to configure these features and codes on your telephone.

The Call features and Flexible Feature Codes (FFC) described in the following sections must be assigned to your telephone and supported by system software.

To access a feature, press a Feature key or enter a Flexible Feature Code.

Note: Whenever “Lift the handset” appears in this guide, you can also press the Headset or Handsfree button.
Make a call

This section describes features associated with making a call. There are several ways to make a call from an i2002 telephone.

To make a call:

1. Do one of the following:
   a. Press the Line (DN) key.
   b. Lift the Handset.
   c. Press the Handsfree key.
   d. If a Headset is connected, press the Headset key.

2. Dial the number.

Make a call while on-hook

1. Leave the Handset in the cradle.
2. Press a Line (DN) key.
3. Dial the number when dial tone sounds.
4. When the called party answers, lift the Handset.

Make a call while off-hook

1. Lift the Handset.
2. Dial the number.
Use Handsfree calling

Use Handsfree calling to operate a built-in microphone and speaker instead of the handset. While on an active call, you can switch between Handset and Handsfree mode.

To answer a call in Handsfree mode:

Press the Handsfree key.

To discontinue a Handsfree call:

Press the Goodbye key.

To mute a Handsfree call:

1. Press the Mute key. The LED indicator flashes.
2. Press the Mute key again to return to a two-way handsfree conversation.

To switch from Handsfree to Handset mode:

1. Lift the Handset.
2. Replace the Handset to end the call.

To switch from Handset mode to Handsfree mode:

1. Press the Handsfree key.
2. Replace the Handset.
3. Press the Goodbye key to end the call.
To use a Headset:

1. Connect the Headset to the headset jack or the handset jack depending on the headset type and telephone.
2. Press the Headset key.
   
   Note: Amplified and unamplified headsets are compatible with the i2002 Internet Telephone.
3. Adjust your Headset volume by using Volume adjustment... in the Telephone Option menu.

To switch from Handsfree to Headset:

1. Connect the Headset and put the headset on.
2. Press the Headset key.

Use the Corporate Directory

Use the Directory feature to view, select, and dial Corporate Directory numbers.

1. Press the Directory key to access the Directory.
2. Using the Navigation key, highlight Corporate Directory.
3. Press the Select key.
To search for a specific number:

1. When prompted, use the keypad to enter the desired name in the format, “Last, First”.

2. To edit the entry, select from the following:
   a. To toggle letters, use the 1-9 number keys.
   b. For upper case letters, use the second level of feature keys and press the Case key.
   c. For special characters, use the up and down Navigation keys (a Choose key appears for selecting the characters).
   d. To remove the letter to the left of the cursor, press the Delete key.

3. Press the Search key to find the desired name.

   Note: A successful search displays the first match on the screen.

4. Choose one of the following:
   a. Press the Dial key to dial the resulting number.
   b. If there is no match to the search query, start a new search or change the information in the initial search.
   c. Press the Quit key to exit without dialing.
Make a call

To scroll to a specific number:

1. Using the Navigation keys, scroll through the names in the Corporate Directory.
2. Press the Dial key to dial the resulting number.

Use Predial

Use the Predial feature to enter, preview, and edit numbers before dialing.

To use Predial:

1. Without selecting a Line key, dial the number.
2. Press a Line key to dial the number.
3. Lift the Handset when the called party answers or, if in Handsfree mode, begin to talk.

To edit a Predial number:

1. Without selecting a Line key, dial the number.
2. Using the Navigation keys to highlight the numbers, re-enter new numbers.
3. Press a Line key to dial the number.
Use Auto Dial

Use the Auto Dial feature to display, store, and automatically dial telephone numbers.

**To use Auto Dial:**

1. Lift the **Handset**.
2. Selecting an associated **Auto Dial** key from the upper display area, press to dial the number.

**To display Auto Dial number:**

1. Press the **Display** key.
2. Selecting from the upper display area, press the configured **Auto Dial** key.

**To store an Auto Dial number:**

1. Without lifting the handset, press the appropriate **Auto Dial** key.
   
   *Note:* The display screen displays the word “Autodial” next to the appropriate key.
2. Dial the telephone number (including access code) to be stored on the selected **Auto Dial** key.
3. Press the **Auto Dial** key a second time to store the number on the selected key.
   
   *Note:* Once a number has been stored, the word “Autodial” disappears, and the stored number displays.
4. Assign a label to the key.
   
   *Note:* After assigning the label, the number disappears and only the label appears on the screen next to the key.
Activate Ring Again

Use the Ring Again feature if a busy tone sounds or when there is no answer after placing a call. Ring Again activates an audible tone notification that you receive when the person you tried calling is available or has used their telephone. Ring Again also automatically redials the number.

To use Ring Again:

1. Dial a number and receive a busy tone or no answer.

2. Choose one of the following:
   a. Press the Ring Again key.
   b. Enter the Ring Again Activate FFC.

To call a Ring Again party when you receive notification:

1. After receiving the notification tone, lift the Handset.

2. Press the Ring Again key to automatically dial the number.

To Quit Ring Again before notification:

Choose one of the following:

a. Before hearing the notification tone, press the Ring Again key a second time.

b. Enter the Ring Again Deactivate FFC.
Redial last number called

Use the Last Number Redial feature to automatically redial the last dialed number.

To use Last Number Redial:

Choose one of the following

1. To redial using the Handset:
   a. Lift the Handset.
   b. Press the Line (DN) key.

   or

2. Without lifting the Handset, press the Line (DN) key twice (the last number dialed is automatically redialed).

Use Speed Call

By entering a one, two, or three digit code (0–999), use the Speed Call feature to store, edit, and automatically dial frequently called telephone numbers.

To store a Speed Call number:

1. Press the Speed Call Controller key. The triangular icon flashes, indicating programming mode.

2. At the prompt:
   a. Enter a one-, two-, or three-digit code (0-999), and telephone number (internal, external, or long-distance number).
   b. If required, dial the access code.

3. Press the Speed Call Controller key again to save the code and number. The flashing icon turns off.
To make a Speed Call:

1. Lift the Handset.
2. Press the Speed Call Controller key.
3. Dial the Speed Call code to automatically dial the number.

Make a System Speed Call

Use the System Speed Call feature to dial Speed Call codes that override all restrictions on a call.

To make a System Speed Call:

1. Lift the Handset.
2. Press the System Speed Call key or the System Speed Call Controller (SScCtl) key.
3. Dial the Speed Call code to automatically dial the number.

Use Hot Line

Use the Hot Line feature to automatically dial a specific number. Other features, such as Call Redirection, can be added to Hot Line. Call Redirection redirects a Hot Line call to be answered only by a person.

To use Hot Line:

Press the Hot Line to automatically dial the number.
Make an Intercom call

Use the Intercom feature to call a member of your intercom group by pressing the code assigned to each member.

To make an Intercom call:

1. Lift the **Handset**.
2. Press the **Intercom** key.
3. Dial the one- or two-digit code for the desired intercom group member.

To answer an Intercom call while on a line other than your Intercom group line:

1. Press one of the following keys:
   a. The **Hold** key to put the current call on hold.
   b. The **Goodbye** key to end the call.
2. Press the **Intercom** key and begin to speak.
**Answer a call**

Each incoming call causes the telephone to ring and the LCD indicator to flash.

**To answer a call:**

1. Choose one of the following:
   a. Lift the **Handset**.
   b. Press the **Handfree** button located on the left side of the handset.

   *Note:* The **Handfree** feature may not be available on your telephone.

   c. Press the **Line** (DN) key beside the LCD indicator as it flashes.

   d. Press the **Headset** key if a headset is connected to your telephone.
**While on an active call**

This section describes features available during an active call.

### Place a call on hold

Use the Hold feature when talking on one line and another call arrives on a second line. Retain the original call by putting it on hold and then answer the second call.

**To place a call on hold:**

Press the **Hold** key. The LCD indicator flashes beside the line on hold.

*Note: If **Automatic Hold** is enabled, the active call is automatically put on hold when you answer the second call.*

**To retrieve a call on hold:**

Press the **Line** (DN) key beside the flashing LCD indicator.

### Transfer a call

Use the Transfer feature to redirect a call to the appropriate person.

**To use the Transfer feature to direct a call to a third party:**

1. Press the **Transfer** key. The other party is on hold and a dial tone sounds. The LCD indicator light flashes steadily.

2. Dial the DN number to which the call is transferred.

3. When that number rings or a person answers, press the **Transfer** key.
While on an active call

To go back to the original call, if the transfer is incomplete:

If the person called is not available, press the **Line** (DN) key (next to the LCD indicator) to reconnect to the original call.

**Use Timed Reminder Recall**

Use the Timed Reminder Recall feature to receive a reminder tone when a transferred call is not answered.

**To use Timed Reminder Recall:**

1. Press the **Transfer** key. The call is put on hold.

2. Dial the number to which the call is being transferred.

3. Choose one of the following:
   a. Press the **Transfer** key again.
   b. Replace the **Handset** before the extension answers. This starts the recall timer.

   **Note:** If the transfer is complete, the recall timer stops.

If the transferred call is not answered, your telephone rings:

1. Lift the **Handset** to reconnect to the original caller.

2. Choose one of the following:
   a. Press the **Transfer** key and repeat the transfer (to a different DN).
   b. If the transfer is picked up while you are on the line, press the **Goodbye** key to complete the transfer.
Use Attendant Recall

Use the Attendant Recall feature to contact an attendant during a call and to connect the call to the attendant.

**To contact the attendant while on a call:**

1. Press the **Attendant Recall** key and stay on the line until the attendant answers.
2. Press the **Goodbye** key. The caller remains connected to the attendant.

Use Call Park

Use the Call Park feature to hold temporarily (parked) and retrieve a call from any telephone. Using Call Park does not tie up a line and, when configured network-wide, can be used across networks. A **System Park Extension** can be set to automatically park most calls.

**To park a call on the System Park DN or your own DN:**

During an active call, press the **Park** key twice.

By default, the call is parked on your DN unless a **System Park** is enabled to automatically park calls on the system.

**To park a call on a DN other than the System Park DN or your own DN:**

1. Press the **Park** key.
2. Dial the DN where you want to park the call.
3. Press the **Park** key.
While on an active call

To park a call using the SPRE code or FFC:

1. Press the Transfer key or the Conference key.

2. Dial the Call Park FFC.

3. To use an alternate DN from the System Park DN or your own DN, dial the DN where you want to park the call.

4. Press the Transfer key or the Conference key.

To retrieve a parked call:

1. Lift the Handset.

2. Press the Park key.

3. Dial the Call Park FFC.

4. Dial the DN where you parked the call.

Note: If a parked call is not retrieved within a specified period of time, it rings back to your telephone or to the attendant.
**Record a Calling Party Number**

Use the Calling Party Number feature to record a caller’s number or charge a call to an account number for accounting purposes during an established call.

**To record a caller’s number for accounting purposes:**

1. Press the **Call Party** key, the caller is placed on hold. The Entered number displays.
2. Dial a charge account number or the caller’s number.
   
   **Note:** For information on using the **Charge** key, see “Charge a call or Charge a Forced call” on page 56.
3. Press the **Call Party** key to return to the call.

**Display incoming calls**

Use the Display feature to display a second incoming caller’s number and name (if available) during an active call, without interfering with the call in progress.

**To view the information on an incoming call while on a call in progress:**

1. Press the **Display** key.
2. Press the flashing **Line** (DN) key. The call waiting information displays.

   **Note:** When used with other feature keys, the **Display** key displays information associated with those feature keys.
Trace a Malicious call

Use the Malicious Call Trace feature to trace nuisance calls within your system.

To use Call Trace while on a call:

Press the **Call Trace** key.

To use Call Trace without a Call Trace key:

1. Press the **Transfer** key or the **Conference** key.
2. Dial the **SPRE code** followed by **83** or dial the **Call Trace FFC** to automatically reconnect.
Incoming calls

This section describes features that are used with incoming calls.

Activate Automatic Answerback

When the Automatic Answerback feature is active, your set automatically answers in handsfree mode after one ring; however, calls are *not* forwarded to the voice message service.

To activate Automatic Answerback:

AtoAns

Press the **Automatic Answerback** key.

To deactivate Automatic Answerback:

AtoAns

Press the **Automatic Answerback** key again.

Activate Call Pickup

Use the Call Pickup feature to pick up calls from any telephone in the same pickup group or another pickup group.

To answer a call in your own Call Pickup group:

1. Lift the **Handset**.

2. Press the **Pickup** key, or enter the **Pickup Ringing Number FFC**.

To answer an incoming call in another Call Pickup group:

1. Lift the **Handset**.

2. Press the **Group Pickup** key or enter the **Pickup Group FFC**.
Incoming calls

To answer a call at a specific extension in any pickup group:

1. Lift the Handset.

2. Press the DN Pickup key, or enter the Pickup Directory Number FFC.

3. Dial the DN of the telephone that is ringing (in your call pickup group).

   If the pickup DN or group number is invalid (an overflow burst tone sounds and the screen displays Goodbye and try again), press the Goodbye key.

Use Call Waiting

Use the Call Waiting feature to alert you to an incoming call by producing a tone. It also puts the current call on hold while you answer the new call.

To answer an incoming call while on another call:

1. When the incoming call tone sounds, press the Hold key to put a current call on hold.

   Note: If Automatic Hold is enabled, it is not necessary to press the Hold key.

2. Press the Call Waiting key.

To return to the first telephone call:

1. Choose one of the following:
   a. Press the Hold key to put the second call on hold.
   b. Press the Goodbye key to end the second call.
Incoming calls

2498

1. Press the Goodbye key to end the current call and answer the incoming call.

2. Press the Line (DN) key beside the flashing status icon to answer the incoming call.

If you do not have a Call Waiting key:

2498
While you are away from your desk

This section describes features that are used when you are away from your desk.

Use Call Forward

Use the Call Forward feature to direct incoming calls to ring at another Line (DN). If the telephone is in the process of ringing, that call cannot be forwarded.

To forward your calls or change the forward number:

1. Press the Forward key or lift the Handset and enter the Call Forward All Calls Activate FFC.
2. Dial the DN where you want to forward your calls.
3. Press the Forward key.

To Quit Call Forward:

Press the Forward key or lift the Handset and enter the Call Forward All Calls Deactivate FFC.

To reinstate Call Forward to the same number:

Press the Forward key twice.
Use Internal Call Forward

Use the Internal Call Forward to accept only calls originating at internal DNs to ring at another DN. Calls originating outside your telephone system still ring at your telephone. Current incoming calls cannot be forwarded.

To forward internal calls:

1. Press the Internal Call Forward key or lift the Handset and enter the Internal Call Forward Activate FFC.
2. Dial the DN to which your internal calls will be forwarded.
3. Press the Internal Call Forward key.

To Quit Internal Call Forward:

Press the Internal Call Forward key or lift the Handset and enter the Internal Call Forward Deactivate FFC.

To reinstate Call Forward to the same number:

Press the Internal Call Forward key twice.

Use Remote Call Forward

Use the Remote Call Forward feature to forward calls (from any telephone other than your own) to any telephone.

To activate Remote Call Forward:

1. Lift the Handset.
2. If calling from a telephone outside the system, dial your direct system access number and wait for dial tone.
3. Dial the Remote Call Forward Activate FFC to activate the feature.
While you are away from your desk

4. Dial your Station Control Password. A dial tone sounds.

5. Choose one of the following:
   a. Dial your DN.
   b. To forward calls to the previous call forward telephone number, press the # key. (Do not perform steps 6 and 7).

6. Dial the number to which calls are being forwarded. If calls are forwarded to an invalid number, a fast busy signal sounds.

7. Press the # key.

To Quit Remote Call Forward:

1. Lift the Handset.

2. If calling from a telephone outside the system, dial the direct system access number and wait for the dial tone.

3. Dial the Remote Call Forward Deactivate FFC.

4. Dial your Station Control Password.

5. After hearing the dial tone, dial your DN.

6. Press the # key.
Secure your telephone

Use the Electronic Lock feature to prevent others from making calls from your telephone. The lock consists of a password that you can change.

To lock your telephone:

1. Lift the **Handset**.

2. Dial the **Electronic Lock Activate FFC**.

3. Dial your **Station Control Password**.

4. Choose one of the following:
   a. If dialing locally, press the **Goodbye** key.
   b. If dialing FFC remotely, dial your DN.

To unlock your telephone:

1. Lift the **Handset**.

2. Dial the **Electronic Lock Deactivate FFC**.

3. Dial your **Station Control Password**.

4. Choose one of the following:
   a. If dialing locally, press the **Goodbye** key.
   b. If dialing FFC remotely, dial your DN.
While you are away from your desk

To change your password (must be done from your telephone):

1. Lift the **Handset**.

2. Dial the **Station Control Password Change FFC**.

3. Dial the current password for your telephone.

4. Dial the new password.

5. Dial the new password again.

6. Press the **Goodbye** key.
**Talk with more than one person**

This section describes features that enable conversations between more than two people.

**Use the Call Join feature**

Use the Call Join feature to connect a call to a current active call. This creates a conference between the two callers and yourself.

**To connect a call on hold (on a different line) to your current call:**

1. Press the **Conference** key.
2. Press the **Line** key that has the number of the caller you want to connect to your current call.
3. Press the **Conference** key again to join the person on hold to your conversation.

**Set up a Conference call**

Use a Conference call for three (or six, depending on your telephone’s configuration) people, including yourself.

**To set up a conference call:**

1. While on a call, press the **Conference** key to place the party on hold. You receive dial tone.
2. Dial the number of the person you want to add to the conference call. You can talk privately to the person you are adding at this time.
3. Press the **Conference** key a second time to conference all parties together.
4. If necessary, repeat the procedure until four people are in the conference.
Talk with more than one person

If the person you attempt to add to the conference is unavailable:

1. Press the Goodbye key.

2. Press the Line (DN) key with the flashing icon to return to your original call.

Use the Conferee selectable display and disconnect feature

Use the Conferee Selectable Display feature to list active conferees and disconnect a conferee from the conference call.

To view active conferees:

1. While on a conference call, press the Conferee Selectable Display key to turn on the LCD indicator. Each key press changes the screen to show a different active conferee.

   *Note:* This action has no effect on the display of other telephones involved in the conference.

2. Press the Goodbye key. If configured, the Conference Count Display returns an updated total count of conferees. The LCD indicator turns off.

To disconnect a conferee:

1. While on a conference call, press the Conferee Selectable Display key until the conferee you want to disconnect appears on the screen.

2. Press the DN key on which the conference call is established.

3. Choose one of the following:
   a. For a single conferee, press the Goodbye key. If configured, the Conference Count Display returns an updated total count of conferees.
Talk with more than one person

The LCD indicator turns off.

b. For multiple conferees, repeat steps 1 and 2 until all conferees are disconnected. Then press the **Goodbye** key.

Use Group Call

Use the Group Call feature to automatically call members of a predefined group, one at a time, until they all answer.

**To call group members:**

1. Lift the **Handset**.

2. Press the **Group Call** key or enter the **Group Call FFC**.

   The feature automatically calls all group members. The icon flashes until all members answer.

   The telephone numbers of the group members appear display as they answer. When the last person answers, the **Group Call** indicator lights steadily.

   When a person in your group is on a conference call or another group call, they are not connected to your group call.

   After everyone in the group has answered, only the person who made the group call can put the call on hold.

**To answer a Group Call:**

1. Lift the **Handset**.

   **Note:** About Notification Tones:

   a. If you are on a call and receive three 10-second tones, this is the notification of a group call on your current extension.
b. If you are on a call on another line on your telephone when a group call is made, you receive a long tone through the handset or speaker.

c. If you are already on a conference call or another group call, you do not receive notification of a group call.

To end a Group Call:

Press the Goodbye key.

Note: When the person who made the group call disconnects, the call terminates for all members of the group. However, the members of the Group Call can disconnect from the call and not affect other members on the call.
Work without interruption

This section describes features that provide uninterrupted work time.

Activate Make Set Busy

Use the Make Set Busy feature to make your telephone appear busy to all callers.

To activate Make Set Busy:

Press the Make Set Busy key, or lift the Handset and enter the Make Set Busy Activate FFC.

To deactivate Make Set Busy:

Press the Make Set Busy key a second time to deactivate the feature, or lift the Handset and enter the Make Set Busy Deactivate FFC.
Additional call features

Auto Dial Transfer feature

Use the Auto Dial Transfer feature to transmit digits through your Auto Dial key to the central office after a Trunk Switchhook Flash. You must be on a Central Office/Exchange (CO) trunk call from or to a CO that offers Centrex or exchange line-type features.

To use Auto Dial Transfer when picking up an incoming trunk call:

1. Press the Centrex Switchhook Flash key and wait for interrupted dial tone.
2. Press the Auto Dial key to call the number desired.
3. Press the Goodbye key to end the call.

Use the Buzz signal

Use the Buzz feature to notify another person of a call, a visitor, or a request. Two telephones that are linked together enable one person to signal the other. The person signaled hears a buzz.

To buzz the telephone linked to your telephone:

1. Press the Buzz key.
   The telephone linked to your telephone buzzes as long as you press the key.
2. When you are finished signaling, press the Buzz key.
Use Call Page Connect to make an announcement

Use the Call Page Connect feature to make an announcement over a paging system.

Note: A Page key on an attendant console overrides and disconnects the telephones. The telephones must re-access the page trunk.

To connect to Call Page:

1. Lift the Handset.

2. Dial the Page Trunk Access Code to complete the connection to the page system.

3. Make your announcement.

To disconnect Call Page:

4. Press the Goodbye key.

Use Centrex/Exchange Switchhook Flash

Use the Centrex/Exchange Switchhook Flash feature during an established call to use a Centrex service, such as Call Transfer or Three-Way Calling.

To use Centrex/Exchange Line Switchhook Flash:

1. While in a call, press the Centrex Switchhook Flash key.

A special dial tone sounds.

2. Dial the codes for your custom Centrex feature.

3. Press the Goodbye key to end the call.
Charge a call or Charge a Forced call

Use the Call Charge feature to charge a call to a specific account. The Forced Charge feature charges long-distance calls from a telephone restricted to local calls.

To charge a local or long-distance call to an account before you dial:

1. Lift the Handset.
2. Press the Charge key or dial the Call Detail Recording FFC.
3. Dial the charge account number.
4. When the dial tone sounds, dial the number.

To charge a call in progress:

1. Press the Transfer key or the Conference key.
2. Press the Charge key or dial the Call Detail Recording FFC.
3. Dial the charge account number.
4. Press the Line (DN) key to return to the call.
To charge a call to an account when you transfer a call:

1. Press the **Transfer** key. The call is on hold.
2. Press the **Charge** key or dial the **Call Detail Recording FFC**.
3. Dial the charge account number.
4. After the dial tone, dial the number to where the call is to be transferred.
5. Press the **Transfer** key when you hear the telephone ring.

*Note:* You can talk privately to the person at the transfer number before you press the Transfer key.

---

To charge a call to an account when you add someone to a conference call:

1. Press the **Conference** key. The call is placed on hold.
2. Press the **Account** key or dial the **Call Detail Recording FFC**.
3. Dial the charge account number.
4. Dial the number of the person you want to add to the conference.
5. Press the **Conference** key.
Use Enhanced Override feature

Use the Enhanced Override feature to override an active call after you have attempted a Forced Camp-on. Use Enhanced Override to make a simple call or a consultation call, such as placing a call on hold and calling another party.

To use Enhanced Override:

You receive a busy signal after dialing a telephone number.

1. Press the Override key or enter the Override FFC to initiate a Forced Camp-on.

If either person on the call disconnects at this time, you receive an overflow (fast busy/engaged) signal.

2. Press the Override key again or enter the Override FFC again.

The other two persons on the call receive an override tone and a conference call is established between the three of you. If anyone disconnects, the other two persons remain connected.

To end the connection:

Press the Goodbye key.

Use Forced Camp-on feature

Use the Forced Camp-on feature to automatically ring another telephone (internal or external) immediately after that telephone disconnects from its current call. Forced Camp-on in conjunction with Priority Override is referred to as Enhanced Override.

To use Forced Camp-on:

You are receiving a busy signal after dialing a telephone number.

1. Press the Override key, or enter the Override FFC, to initiate a Forced Camp-on.
**Note:** The person you called receives a tone, and you receive a ring/ringback signal or a busy/engaged signal, depending on the options chosen. You are now camped-on to the number you dialed.

2. When the person you called finishes their call, your telephone automatically dials the number. Your and their telephones ring.

To answer a call camped-on to your extension:

When the telephone rings, lift the **Handset**.

**Note:** You can program your telephone for either Camp-on or Call Waiting, but not both.

**Override a busy signal**

Use the Override feature to override a busy signal and interrupt another call.

**To override a busy/engaged signal:**

1. Dial a telephone number and receive a busy signal.

2. Press the **Override** key, or enter the **Override FFC**.

The people in the targeted call receive a tone for approximately one second. After Override joins you to their call, a short tone repeats every sixteen seconds.

**To end the connection:**

Press the **Goodbye** key.
Use Privacy Release

Use the Privacy Release feature to enable one or more people who share your DN to join a call.

To use Privacy Goodbye in an established state:

Press the Privacy Release key during a call. A person joins the call by pressing the shared number (DN) key on their telephone (Multiple Appearance DN feature).

Use Radio Page

Use an on-site Radio Page system feature to page a person and stay on the line until they answer. The paged person answers the call after entering a special Page Meet-me code from any telephone.

To use Automatic Preselection (Meet-me page):

1. Lift the Handset.

2. Dial the Radio Paging Access FFC. The paging tone sounds (two beeps followed by a dial tone).

3. Dial the number of the party you want to page. After dialing, the ringback tone sounds.

   Note: The paged person can use any telephone to enter a Radio Paging Answer FFC, plus their own DN number.

4. If your call goes unanswered for a preset time period and a 15-second high pitched tone sounds followed by silence, press the Goodbye key or replace the Handset.
To use Automatic Post selection:
The called party is either busy on the telephone or away from the desk.

To page the called party, there is no need to redial the number of the called party.

2. Dial the Radio Paging Access FFC. The ringback tone sounds.

   Note: The paged person can use any telephone to enter a Radio Paging Answer FFC, plus their own DN number.

3. If your call goes unanswered for a preset time period and a 15-second high-pitched tone sounds followed by silence, press the Goodbye key or replace the Handset.

To answer a Radio Page:
If you carry a Radio Pager, a page indicates that someone dialed your Directory Number (DN).

If the Radio Page system is set up to function in Meet-me mode, you can answer the page call from any telephone.

1. Lift the Handset.

2. Dial the Radio Page Answer FFC. The paging tone sounds.

3. Dial your own DN to connect to the paging caller. If the caller has hung up, a steady high pitched (Number Unavailable) tone sounds.
Use Voice Call

Use the Voice Call feature to page another person or make an announcement through someone else’s telephone speaker.

**To make a voice call:**

1. Lift the **Handset**.
2. Press the **Voice Call** key and make the announcement.
3. Press the **Goodbye** key.

**To respond to a voice call:**

Your telephone rings once and the caller's voice transmits through your speaker. Lift the **Handset**.
Additional features

Virtual Office

When you are away from your office telephone, use the Virtual Office feature to transfer calls and all of its features to a remote telephone.

When designated as the office telephone, the i2002 can be activated for Virtual Office by an i2004, i2050, or an i2002 Internet Telephone. A Virtual Office login from an i2002 Internet Telephone to an i2004 or i2050 might be blocked in certain situations. Consult your local network administrator.

Virtual Office Login

To activate Virtual Office on your Office telephone from your Remote telephone:

1. Press the Services key to access the Options menu.
2. Using the Navigation keys, highlight Virtual Office Login.
3. Press the Select key. The display provides a prompt for the User ID.
4. Enter your User ID.
5. Press the Select key. The display provides a prompt for the password.
6. Enter the home Station Control Password (SCPW).
7. If the User ID is not found locally the message “Locating Remote Server” displays.

Note: After three failed login attempts, you must wait one hour before attempting to login again.
Additional features

Virtual Office on your Remote Telephone

A successful login transfers all the features, time, date, and tones to your remote telephone from your office telephone.

Logged on to i2002

Figure 1: Logged on using an i2002

Figure 2: Logged on using an i2004

Figure 3: Logged on using an i2050

On the i2004 and i2050 displays, the two top left feature keys always remain empty (as your i2002 supports only four keys).

A User information line appears on all displays listing the number of your office telephone.
Additional features

Virtual Office on your Office Telephone

When activated for Virtual Office by a remote telephone, your office telephone is *logged out* and no longer operational.

A Logged Out message displays on your telephone alerting you that it is being used for Virtual Office.

To regain operation of a telephone being used for Virtual Office:

1. To completely disconnect your office telephone from the remote telephone:
   a. Press the **Home** key.
   b. Enter your User ID and password (this logs the office telephone back on to your office network).

2. To use your office telephone as the remote telephone for Virtual Office, press the **Virtual** key to login to another telephone.

To log out from a remote telephone:

1. Press the **Services** key to access the **Options** menu.
2. Using the **Navigation** keys, highlight **Virtual Office Logout**.
3. Press the **Select** key.
### Troubleshoot Virtual Office

When using Virtual Office you may encounter error messages displayed on your screen. The following table lists error messages and actions to correct the causes.

#### Table 1: Troubleshoot Virtual Office (Part 1 of 3)

Additional features

Succession Branch Office

The Branch Office telephone can operate in the Normal or the Local mode.

Normal Mode

The telephone registers with the Main Office and receives telephone services from the Main Office. At any time during Normal Mode, you can check local mode functionality (make and receive calls) by enabling Local Mode and returning to Normal Mode. After testing, you can return to Normal Mode by using the Resume Normal Mode command or by waiting for ten minutes.

Local Mode

If the WAN connection goes down the telephone loses communication with the Main Office TPS. It then registers with the Branch Office and receives telephone services from the Branch Office. When in Local Mode, the telephone displays “LOCAL MODE”.

Use Test Local Mode to check local mode functionality (make and receive telephone calls). This is useful when provisioning has changed for an Internet Telephone on a Branch Office Controller.

1. Press the Services key to access the Services menu.
2. Using the Navigation keys, highlight Test Local Mode.
3. Press the Select key (the telephone resets and registers to the Branch Office).

<table>
<thead>
<tr>
<th>Displayed Message</th>
<th>Probable Cause</th>
<th>Actions</th>
</tr>
</thead>
</table>
Resume Normal Mode

Use the Resume Normal Mode command to return to Normal Mode after testing survival functionality.

Note: If the Resume Normal Mode command is not performed after testing, the telephone automatically returns to Normal Mode in ten minutes.

1. Press the Services key to access the Services menu.
2. Using the Navigation key, highlight Resume Normal Mode.
3. Press the Select key (the telephone registers back to the Main Office).

Troubleshoot Branch Office

When using Branch Office you may encounter error messages displayed on your screen. The following table lists error messages and actions to correct the causes.

<table>
<thead>
<tr>
<th>Display Message</th>
<th>Probable Cause</th>
<th>Actions</th>
</tr>
</thead>
<tbody>

</tbody>
</table>
Hospitality features
The hospitality features in this section are intended for hotel operations.

Set Automatic Wake-Up

Use the Automatic Wake-Up feature to receive a timed reminder call. From your telephone, you can program the Meridian 1, Succession 1000, or Succession 1000M to automatically place a call to yourself at a predetermined time. When you answer the call, recorded music plays for up to 30 seconds, followed by a prerecorded announcement or the attendant.

To enter the time for an Automatic Wake-Up call:

1. Lift the Handset.
2. Dial the Automatic Wake-Up Request FFC.
3. Dial the Automatic Wake-Up time in a 24-hour time format (hhmm). A tone sounds to confirm your entered time.
   
   Note: In a 24-hour time format, 7:30 a.m. is entered as 0730; 9:45 p.m. is 2145.
4. Press the Goodbye key.

To Quit an Automatic Wake-Up call:

1. Lift the Handset.
2. Dial the Automatic Wake-Up Quit FFC.
3. Press the Goodbye key.
To verify the time for the Automatic Wake-Up call:

1. Lift the Handset.

2. Dial the Automatic Wake-Up Verify FFC.

3. Dial the Automatic Wake-Up time in a 24-hour time format (hhmm). If your query matches the preset time, a confirmation tone sounds.

   *Note:* In a 24-hour time format, 7:30 a.m. is entered as 0730; 9:45 p.m. is 2145.

4. Press the Goodbye key.

**Activate Message Registration**

Use the Message Registration feature to read, change, or reset meters that log your hotel telephone calls.

**To read meters:**

1. Press the Message Registration key.

2. Dial the room Directory Number (DN).

3. Press the Message Registration key.

**To change a meter:**

1. Press the Message Registration key.

2. Dial the room DN number.

3. Dial the correct meter count.
Hospitality features

4. Press the * key.

5. Press the Message Registration key.

To reset a meter to zero:

1. Press the Message Registration key.

2. Dial the room Directory Number (DN).

3. Press the * key.

4. Press the Message Registration key.

Use Maid Identification

Use the Maid Identification feature to track the cleaning status of rooms. The maid enters the information from the telephone in each room.

To enter cleaning status:

1. Press the Room Status key.

2. Dial the Directory Number (DN) for the room for which the cleaning status is being changed.

3. Dial one of the following cleaning status codes:
   1 = Cleaning requested
   2 = Cleaning in progress
   3 = Room cleaned
   4 = Room passed inspection
   5 = Room failed inspection
   6 = Cleaning skipped
   7 = Not for sale

   The interrupted dial tone sounds.
* 4. Press the * key.

5. Dial the Maid ID. If you dial the wrong Maid ID, press the * key and redial the ID.

6. Press the Room Status key.

Display Room Status

Use the Room Status feature to print the status of a room using the Display Module.

To read the status of a room:

1. Press the Room Status key.

2. Dial the Directory Number (DN) for the room. The DN displays followed by a two-digit code.

   a. The first digit indicates the occupancy status:

      0 = Room vacant
      1 = Room occupied

   b. The second digit indicates the cleaning status of the room:

      1 = Cleaning requested
      2 = Cleaning in progress
      3 = Room cleaned
      4 = Room passed inspection
      5 = Room failed inspection
      6 = Cleaning skipped
      7 = Not for sale

3. Press the Room Status key.
To change the status of a room:

1. Press the **Room Status** key.

2. Dial the **Directory Number** (DN) for the room. The DN displays followed by a two-digit code.
   a. The second digit indicates the occupancy status:
      - 0 = Room vacant
      - 1 = Room occupied
   b. The second digit indicates the cleaning status of the room:
      - 1 = Cleaning requested
      - 2 = Cleaning in progress
      - 3 = Room cleaned
      - 4 = Room passed inspection
      - 5 = Room failed inspection
      - 6 = Cleaning skipped
      - 7 = Not for sale

3. Dial the status code for the room. A three-digit code appears. The first digit indicates the occupancy status, the second is the old cleaning status, and the third is the new status.

4. Press the **Room Status** key.
## Flexible Feature Codes (FFCs)

Use this table to keep track of the FFCs assigned by your system administrator.

Terms you should know

Attendant
A telephone operator in your organization.

Auto Dial
A telephone number programmed on the AutoDial key for one touch dialing.

Call party information
The display showing Call Party Name Display (CPND) information including the telephone number and name of the incoming call. The system must have CPND enabled.

Date/time display
The current date and time when the telephone is in an idle state.

Directory key
Enables access to the Corporate Directory.

Directory Number (DN)
A number consisting of one to seven digits for a telephone. Also known as an extension number.

Expand to PC
A Fixed key on the i2002 telephone that is reserved for future feature development. An audible non-working tone is generated along with a display message Service not available if this key is pressed.

Fastbusy
A signal given when all outgoing lines are busy.

Feature display
An area that shows status information about the feature in use. It also displays the name and status of the active session.
Terms you should know

FFCs

See Flexible Feature Codes.

Fixed key

The hard labeled keys on your telephone.

Flexible Feature Codes (FFCs)

Specialized codes entered using the dial pad that enable features, for example Automatic Wake-Up call.

Handsfree

A method of conversing with the party on the other end of the line without lifting your handset.

Inbox (Message)

A Fixed key on the i2002 telephone that connects to your voice messaging system when the key is pressed.

Indicator

An LCD or an LED that indicates the status of a feature by the flash, wink, steady on, or off.

Information display

Any display of call activity, lists, prompts, and status of calls. On the i2002 telephone this information area is a one-line by twenty-four characters. If the text message exceeds this area, a scroll arrow icon indicates that you must use the scroll keys to view the remaining text.

Information line

A one-line by twenty-four character area which displays date and time or application information.

Interrupted dial tone

A broken or pulsed dial tone, heard when you access some of the features on your telephone.

Meridian 1

An office communications system.
Terms you should know

More...

An option allowing access to the multiple layers of the Soft keys. These keys are the four keys located directly below the display area.

Off-hook

Any line that is selected to either make a call or receive an incoming call. The term *off-hook* is applied, regardless of whether the end-user actually lifts up the handset, or presses a line key, or is automatically answered at the set, or a line is automatically selected for an outgoing call.

Paging tone

A special tone heard when using the Radio Paging feature. You hear two beeps followed by dial tone.

Primary Directory Number

The main extension number on your telephone. It is referred to by the Primary Directory Number (PDN) key.

Private Line

A feature that can be assigned to your telephone. With this line, you can reach an outside number without dialing a code to access an outside line. Internal extensions cannot be dialed from a private line.

Programmable Line (DN)
/Feature Keys (self-labeled)

The four keys located at the sides of the upper area of the display.

Quit key

A Fixed key on the i2002 telephone that is used to exit applications.

Ringback/ring tone

A sound indicating that a call you have made is ringing at its destination.
Secondary Directory Number

A second incoming/outgoing line for your telephone.

Shared Directory Number

A DN (extension) that is shared by two or more persons.

Soft Keys (self-labeled)

A set of keys programmed by your system administrator. These four keys located directly below the display area have four programmable layers. The layers are accessed through the More... key. These keys are also used to configure parameters in the Telephone Option menu.

Special dial tone

The three consecutive tones followed by dial tone that you hear when accessing telephone features.

Status Messages

A message displayed to inform the user of important information. A right arrow appears if more than one Status Message is present. Examples of Status Messages include: Message Waiting, All Lines Forwarded to: 6453, Do Not Disturb On, Ring Again active, Ringer is OFF, and Line x Unavailable.

System or Switch

A Meridian 1, Succession 1000, or Succession 1000M; your office communication system.

Switchhook

A button that the handset presses down, disconnecting your call when you replace the handset. The handset (when lifted) releases the switchhook and you either answer an incoming call or you receive a dial tone to make a call.

User Interface

In this User Guide, User Interface refers to the screen displays that interact with the end-user as a result of an action or event.
