

How to Embed a Kaltura Video in an Assignment in Canvas

1. Login to your course in Canvas and click the Assignments menu on the left
2. Click the **+ Assignment** Button at the top right 
3. Name the assignment as you normally would
4. Click the power plug icon at the far right in the text box

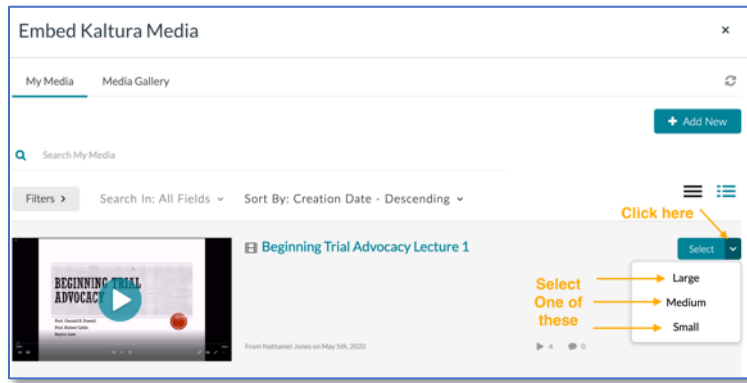

5. Click on the words **Embed Kaltura Media** (not the arrow below it)

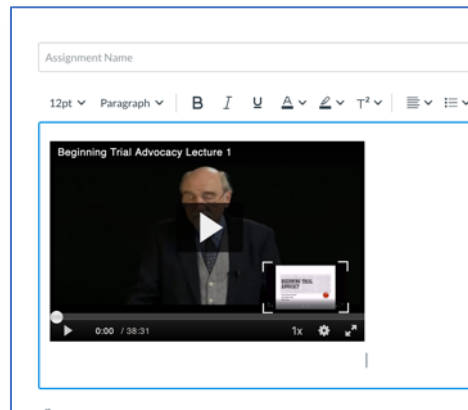

6. Locate the video you want to share

7. Click the down arrow next to select **Select** on the right and click on small medium or large. (this will dictate the size of the video in the assignment. Students can still full-screen the video if needed when watching)

8. After a few seconds, the video will appear in the assignment

9. Complete the rest of the assignment parameters as you normally would.
