Students who plan to apply to physical therapy (PT) schools bear the ultimate responsibility of determining specific coursework required for each school where application is to be made.

Prerequisite coursework found on this planner indicates only the minimum requirements for most PT schools in the U.S. Students who perform well in additional science classes are more likely to be interviewed for PT programs.

*While many PT schools will accept College Algebra for the math requirement, both Physics (1408/1409 or 1420/1430), sequences have prerequisite requirements of MTH 1304(Precalculus) or 1321(Calculus I) respectively).

** Please refer to individual PT schools' websites for preferred Anatomy & Physiology sequence.

***Technical Writing (ENG 3300) is recommended by most PT schools. This class can be used to replace ENG 1304 for some degree plans at Baylor University.

****Developmental Psychology may be taken as either PSY 3341 or 3350 depending on major. Some PT schools prefer or require one of these choices. Others prefer or require Abnormal Psychology, which may be taken as either PSY 3321 or 3330 (Psychopathology) depending on the student's major.
