

This guide offers a recommended course sequence for students preparing for medical school. The courses listed indicate only the **MINIMUM requirements** for most medical schools in the U.S. and is **not designed for any specific major**. Students who plan to apply for medical school bear the ultimate responsibility of determining specific coursework required for their application and must fulfill the requirements for their degree and major in order to graduate.

Each medical school determines its own course requirements for admission. While there is significant similarity among the medical schools, differences do occur. Students should refer to the respective medical school's website for the official and most current requirements.
