Baylor University Press has recently picked up the publishing rights for an extremely important book that was first published in Germany in the mid 20th century. The book is Rudolf Bultmann's *Theology of the New Testament*, originally published in two volumes, but now compiled within a single cover. The preeminent book in this field of study, it is both highly influential (selling 150 copies every year, even 60 some years after its initial publication) and increasingly seen as a product of its day that requires careful adjudication.

I am the co-editor of a book entitled *Beyond Bultmann*, to be published by Baylor University Press in 2014. This book will be comprised of thirteen essays by first-class established scholars whose task is to engage with Bultmann's work chapter by chapter, updating the conversation about the issues that he deals with, in light of developments within the discipline over the past 60 years. Since Bultmann was German, it is appropriate that three of those contributors are German scholars. They are writing their articles for this book in German, having agreed that those articles will be translated into English in order to be included within the volume *Beyond Bultmann* (as stipulated by Baylor University Press). Accordingly, this application is seeking funds to support the translation of two of those three articles by a qualified translator of German books and articles in the field of New Testament studies.
