**STEP 1:** Print card in landscape mode, on both sides, flip on the short side

**STEP 2:** Color card (it will be harder to color later)

**STEP 3:** Put copper tape or foil along the rectangles

**STEP 4:** Poke hole in the X with a pen or pencil

**STEP 5:** Insert light’s bulb through the hole

**STEP 6:** Use clear tape to secure light prongs on top of copper tape or foil. The shorter prong points toward the battery. The longer silver prong point toward the top of the card.

**STEP 7:** Use clear tape to secure the battery on top of the copper tape or foil. The positive side should be facing upwards.

**STEP 8:** Fold card over and see the Pat Neff Hall building light up!
