STEP 1: Print card in portrait mode, on both sides, flip on the short side
STEP 2: Color card (it will be harder to color later)
STEP 3: Put copper tape or foil along the rectangles
STEP 4: Poke hole in the X with a pen or pencil
STEP 5: Insert light's bulb through the hole
STEP 6: Use clear tape to secure light prongs on top of copper tape or foil. The shorter prong points toward the battery. The longer silver prong points toward the top of the card.
STEP 7: Use clear tape to secure the battery on top of the copper tape or foil. The positive side should be facing upwards.
STEP 8: Fold card over and see the Pat Neff Hall building light up!
