All services in organized space is great for relieving stress and anxiety. Take some time to organize your space. If this task seems too daunting, try only tackling one area a day. Having a clean, tidy space also makes it easier to focus. You can use the 5-2-1 system. Take 5 minutes to tidy up one area in your room, then take a 2-minute break, and repeat.

Complete a quick survey about your voice! If you or someone you know is on the autism spectrum and you/they would like to meet and get to know fellow students on the spectrum, please contact Sarah_Patterson1@baylor.edu.

In the year 2000, there was one person out of every 150 on the autism spectrum, and today, there is one out of every 70. As noted by the Autism Acceptance 2021 Study, 60% of parents of autistic children in the United States experience higher levels of anxiety, and 27% experience higher levels of depression.
