### Notes about major requirements:

- This major is appropriate for undergraduate students entering health care professions. This major provides students an interdisciplinary humanities curriculum designed to foster: faith and spiritual formation; an understanding of the complexity of health and healing; and respect for the cultural and pluralistic diversity in the University, society at large, and the healing arts. Through this program, students who plan to enter a healthcare profession are challenged with the historical, ethical, philosophical, literary, legal, social and religious dimensions of contemporary medical practice. The goal of the program is to provide a humanistic and Christian framework for examining modern healthcare. The program remains faithful to the mission of the university to assist students in both their intellectual and spiritual formation, especially as it relates to their pre-health studies.
- It is strongly recommended that the Medical Humanities major that is interested in medical school also have a science minor.
- MH Elective: Choose 15 hours from the core course requirements and 15 hours from the medical humanities electives. See class options in the Baylor Undergraduate Catalog.
- For more information, see the Baylor Undergraduate Catalog.

*Because of the number of electives, there is enough room for a minor with this major.*
