Notes about major requirements:

– **Pre-Major:** All students are admitted as a Pre-NSC major. Students may apply to be admitted into the NSC major when they have achieved certain requirements. Please see your catalog for those requirements.

– **Important Note:** A student who earns a D or F in a PSY or NSC course may repeat the course. However, a student earning a second D or F in the same, or in a subsequent PSY or NSC course, will not be eligible to continue in the Psychology or Neuroscience major. The student may, however, be eligible to continue studies in another major in the University. Students who believe they have individual circumstances warranting an exception to these grade minimums and failure policies may appeal to the department chair.

–Neuroscience Electives: Choose two from NSC 3311, 3320, 3323, 3370, either 4317 or 4312, 4324, or 4V96.

– Special information regarding elective hours in neuroscience: Students planning on graduate study or medical school are strongly encouraged to obtain research experience. Several of the elective courses are research-oriented, but the principal course is 4V96 Special Topics, a variable credit course usually taken for three semester hours of credit twice. Students desiring to work with a professor should be aware that each faculty member has his/her own criteria for admitting students into the laboratory and for awarding academic credit. Most of the faculty require that you agree to work in the laboratory for three semesters—once as a volunteer and then twice for academic credit. As opportunities to work in a given lab are limited, students should make arrangements with a professor at the beginning of the junior year. See the Neuroscience Advisor for details about 4V96 and other elective courses.

– English requirement: Students majoring in the sciences may take ENG 3300 instead of ENG 1304.

– A grade of "C" or better is required in all psychology and/or neuroscience courses used for the major. A grade of "C" or better is also required for all of the non-psychology/non-neuroscience classes included as part of the major requirements. See the audit or undergraduate catalog for a list of these courses.

– For more information, see the Baylor Undergraduate Catalog.

Please see reverse side for important information on general requirements.
